# Correspondence Memorandum

Date: June 11, 2025 (Revised)

**To:** Budget and Operations Committee

From: Michelle Baxter, Director

Office of Enterprise Initiatives

**Subject:** ETF Modernization Projects Update

This memo is for informational purposes only. No Committee action is required.

Below are the Department of Employee Trust Funds' (ETF's) modernization projects updates through the date of this report. This provides the Budget and Operations Committee (Committee) with an overview of modernization highlights, health, major milestones, and key issues and risks.

#### **Executive Summary**

The Insurance Administration System (IAS) program was designed to streamline the administration of multiple insurance benefits, enhance process efficiency, and improve customer service through online access. While we have made significant progress toward our milestones, several critical challenges continue to put the program at risk.

Project teams are continuing to work diligently to complete remaining tasks and ensure all stakeholders are prepared for the system's launch. For more details, please refer to the "IAS Update" memo (Ref. GIB | 05.21.25 | 12).

As previously communicated, the Office of Internal Audit (OIA) is conducting an independent review of the IAS program. This review aims to assess program management and ensure the achievement of key outcomes. See Attachment C for the most recent report.

The Pension Administration System (PAS) Search and Selection Project's overall health is green, although schedule for individual milestones may be slightly at risk. Notice of Intent to Award was sent March 23, 2025, and can be found on ETF's website at <a href="https://etf.wi.gov/node/37111">https://etf.wi.gov/node/37111</a>.

ETF Modernization Projects Update June 11, 2025 (Revised) Page 2

#### **IAS Implementation**

ETF will proceed with a limited implementation with the Universities of Wisconsin (UWs) on July 1, 2025, followed by a full implementation with all other employers targeted for March 1, 2026.

A limited implementation with the UWs will include eligibility and enrollment for active employees within My Insurance Benefits (Benefitplace). Billing, payments, and related reporting will continue to be managed as they are today. This approach will include several other key components to support end-to-end processes, including ETF's new Employer Transaction Application (ETA) that allows for eligibility information to be received and submitted to My Insurance Benefits, and the member and employer portals that provides entry into My Insurance Benefits and the ETA.

Doing a focused implementation of My Insurance Benefits with the UWs will allow us to:

- Continue to resolve issues in My Insurance Benefits
- Learn from the UWs' experience in the system and make improvements for the launch to all employers
- Look for opportunities to optimize the customer experience within the system
- Facilitate the UWs' successful implementation of Workday, their new technology platform for human resources, finance, and other administrative processes, on July 1

This decision was made in close consultation with program leadership and key stakeholders, all of whom have expressed their support for this revised approach. The decision reflects our commitment to ensuring a stable, successful transition that prioritizes system readiness, data integrity, and user adoption.

This reporting period reflects a temporary narrowing of scope, focusing exclusively on the launch with the UWs, which has been prioritized to ensure successful delivery within the defined timeline. This shift allows for greater visibility into progress, risks, and key decisions associated with this critical initiative. Concurrently, a comprehensive replanning effort is underway for the remaining components of the broader program. We anticipate that full program reporting—covering all projects—will resume in the next board report, once revised plans and updated timelines are finalized.

#### IAS OIA's Observations and Status

OIA's May report has recommended the Program include additional local employers in the new testing plan, and we appreciate their insight and perspective (see Attachment C). While we recognize the potential value of this approach, implementing it at this time would expand the scope of the program beyond what was originally approved. Given our current priorities, timeline, and resource constraints, we do not plan to pursue this recommendation within the current program. However, we will document it for consideration in future projects/programs.

#### **IAS Summary**

- Data Transformation continues UW Mock Conversion efforts and researching/resolving exception errors. Production Conversion and Manual Updates will start the week of June 2. Securian Enrollment extract development started.
- The UWs has started using the Employer Portal to access ETA.
- Cutover completed assessment to automatically bridge enrollments from My Insurance Benefits to MEBs. Targeting to complete a significant number of transactions prior to Open Enrollment.
- COBRA process definition and solution confirmation are underway.
- Automated Benefit Detail Extract (ABDE) automation, requirements, testing, and validation are underway.
- Replanning efforts are currently underway for the remaining employers, including resolution of outstanding defects and the addition of an end-to-end testing cycle that is expected to run through August.

|   | data exchange, or                                 |                    |                         |          |  |       |
|   | overall system                                    |                    |                         |          |  |       |
|   | performance.                                      |                    |                         |          |  |       |

#### **PAS Search and Selection**

### <u>Accomplishments</u>

- Notices of intent to award were issued to TELUS Health and Heywood.
- Both vendors were sent a Proof of Concept (POC) contract.
- Use case and tabletop topics have been finalized and shared with both vendors.
- POCs have been scheduled and will occur September 29-November 21, 2025.

Table 3. PAS Search and Selection: Health

| Overall Health | Schedule | Scope     | Budget    | Transition Management |
|----------------|----------|-----------|-----------|-----------------------|
| On Target      | At Risk* | On Target | On Target | On Target             |

**Table 4. PAS Search and Selection: Project Milestones** 

|  | Start Date | End Date    | % Complete: Duration | Status      |
|--|------------|-------------|----------------------|-------------|
| Initiation   | 03/18/2024 | 05/03/2024  | 100%                 | Complete    |
| System Requirements  | 04/08/2024 | 08/30/2024  | 100%                 | Complete    |
| Develop, Write and Publish RFP   | 08/19/2024 | 10/18/2024  | 100%                 | Complete    |
| Initial Vendor Selection for POCs (includes initial Department Terms and Conditions (DTC) contract negotiations) | 10/15/2024 | 08/29/2025* | 72%                  | On Target   |
| POC  | 03/21/2025 | 12/17/2025  | 28%                  | On Target   |
| Final Vendor Selection (includes contract negotiations)  | 12/17/2025 | 3/6/2026    | 0%                   | Not Started |

<sup>\*</sup> DTC contract negotiations are now occurring prior to the POC. With this change, the schedule remains slightly at risk due to unknown time needed for contracting.

Table 5. PAS Search and Selection: Top Risks

| # | Risk Description  | Impact                               |                                      | Priority            | Mitigation Notes   | Trend    |
|---|---|--------------------------------------|--------------------------------------|---------------------|--|----------|
|   | Summary of the risk.  | Rating:<br>1 (low)<br>to 5<br>(high) | (Prob.)  Rating: 1 (low) to 5 (high) | (IMPACT<br>x PROB.) | What can be done to lower or eliminate the impact or probability.  | <b>+</b> |
| 1 | Resource:<br>Insufficient<br>resources may lead<br>to delays. | 5                                    | 5                                    | 25                  | Focus on resource allocation – assigning individuals not assigned to IAS. Also, completing prework in advance to limit the resource time needed. | <b>→</b> |

| # | Risk Description  | Impact                               | Probability                          | Priority            | Mitigation Notes  | Trend    |
|---|---|--------------------------------------|--------------------------------------|---------------------|---|----------|
|   | Summary of the risk.  | Rating:<br>1 (low)<br>to 5<br>(high) | (Prob.)  Rating: 1 (low) to 5 (high) | (IMPACT<br>x PROB.) | What can be done to lower or eliminate the impact or probability.   | +        |
| 2 | POC – Overlap of<br>POC with initial post<br>IAS Go-Live<br>stabilization period<br>and 2nd phase of<br>IAS Go-Live<br>activities due to<br>contracting delays. | 5                                    | 5                                    | 25                  | Contract requirements related to the POC may delay the POC timeline causing an overlap with IAS go-live. Will need to delay POC if this is realized which will result in a delay of beginning the overall implementation project.   | 1        |
| 3 | Resource –<br>Overburdening staff<br>who are already<br>assigned to other<br>projects.  | 5                                    | 4                                    | 20                  | Focus on resource allocation – assigning individuals not assigned to IAS and identifying areas where there is overlap.  | 1        |
| 4 | Budget – No or<br>delayed budget<br>approval may delay<br>the start of the<br>implementation or<br>preferred vendors<br>becoming<br>unavailable.                | 5                                    | 4                                    | 20                  | Developed budget request with the assistance of ETF's Strategic Partner, Linea and targeting to have initial responses to the RFP by the finalization of ETF's biennial budget request. Will need to work with selected vendor to determine start date and may need to delay if vendor is not available or select a different vendor. | <b>→</b> |
| 5 | Vendor – Limited vendors to meet solution requirements. May influence vendor availability and potential delay in implementation timeline.                       | 3                                    | 3                                    | 9                   | Will need to consider vendor availability during the selection process and to assess a realistic start date of the implementation project.  | <b>→</b> |

| # | Risk Description  | Impact                               | Probability (Prob.)               | Priority            | Mitigation Notes  | Trend    |
|---|---|--------------------------------------|-----------------------------------|---------------------|---|----------|
|   | Summary of the risk.  | Rating:<br>1 (low)<br>to 5<br>(high) | Rating:<br>1 (low) to 5<br>(high) | (IMPACT<br>x PROB.) | What can be done to lower or eliminate the impact or probability. | •        |
| 6 | Contracting – Wis. Stat. § 16.705(1r) Ability to make an award because all vendors have personnel that we would be working with that aren't US based. | 5                                    | 1                                 | 5                   | BCAP monitoring with OLS  | <b>→</b> |

## Status Key:

| Status    | Description  |
|-----------|--|
| Completed | Completed.   |
| On Target | On track to meet expected end date.                                  |
| At Risk   | At risk of not meeting expected end date. Requires attention.        |
| Late      | Past expected end date. Requires immediate attention and mitigation. |

#### Risk Key:

|             | 5 | 5 | 10 | 15 | 20 | 25 |
