Market Value Allocation - Mutual Funds

03/31/2016

12/31/2015

This chart illustrates the percent of PCRA participant assets in each mutual fund category, as classified by Morningstar Inc., as a percentage of total PCRA long-term mutual fund assets. Percentages are calculated as of month-end. Small cap funds are subject to greater volatility than those in other asset categories. International investments are subject to additional risks such as currency fluctuation, political instability and the potential for illiquid markets. Since sector funds focus investments on companies involved in a particular sector, the funds may involve a greater degree of risk than an investment in other mutual funds with greater diversification. All data is for informational purposes only.

Net Asset Flow - All Investment Categories
(3-month period ending 3/31/2016)

The chart illustrates the percent of total net flows within each investment category, as classified by Standard & Poor's and Morningstar Inc., over the last three-month period. Net flow percentages are calculated by adding the purchases and sales amounts within each respective investment category and dividing by the total net flows over the period. Data is for informational purposes only.
