

Want more green?

See how your savings could grow with the Wisconsin Deferred Compensation (WDC) Program.

You are invested in a conservative option, like a money market fund, and the interest rate you are earning on it may be close to 0%, preventing you from maximizing your retirement goals. This means if you have an account with at least \$10,000, you could be missing out on more than \$50,000 over the course of 30 years.

FOR ILLUSTRATIVE PURPOSES ONLY. This hypothetical illustration is not intended as a projection or prediction of future investment results, nor is it intended as financial planning or investment advice. It assumes a 6% annual rate of return and reinvestment of earnings with no withdrawals. Rates of return may vary. The illustration does not reflect any associated charges, expenses or fees. The tax-deferred accumulation shown would be reduced if these fees had been deducted. The example doesn't represent a specific investment product or asset class.
