2017 Perspectives in Practice Survey Report

2017 National Association of Government Defined Contribution Administrators

Perspectives in Practice Survey Report

(BASED ON 2016 RESULTS)

201 East Main Street, Suite 1405 Lexington, Kentucky 40507 Phone: 859.514.9161 www.nagdca.org

Copyright © 2017. All rights reserved. No part of this report may be reproduced in whole or part without written permission from the National Association of Government Defined Contribution Administrators.

The 2017 National Association of Government Defined Contribution Administrators Perspectives in Practice Survey Report presents a detailed analysis of key operating data from the government defined contribution industry, based on confidential surveys submitted by 52 individual plans.

Plans that responded to the survey receive access to a customized Plan Performance Report showing their responses alongside the appropriate industry benchmarks, as well as access to a suite of customized, interactive Online Reporting Tools. Together, these tools can assist member plans in assessing their current operations as well as setting, and meeting, operational goals.

The Perspectives in Practice Survey Report is published by the National Association of Government Defined Contribution Administrators, a trade association whose **mission is to be a premier provider of education**, information, and training, to support plan sponsors and service providers of government-sponsored defined contribution retirement plans in creating successful retirement security outcomes for their plan participants.

NAGDCA's objectives for successfully meeting its mission include:

- Developing and sharing research, data, communication materials, fiduciary standards, governance policies, and best practice information with plan sponsors and service providers;
- · Partnering and building relationships with the retirement plan community; and
- Effectively representing the interests of government defined contribution plans and their participants in federal legislative and regulatory matters.

The 2017 National Association of Government Defined Contribution Administrators Perspectives in Practice Survey Report was compiled, tabulated and analyzed by Industry Insights Inc. (www.industryinsights.com), an independent professional survey research firm that specializes in conducting industry profile surveys, financial operating surveys, compensation studies, market assessment surveys, customer satisfaction research, educational programs and other forms of customized research.

ABOUT THIS REPORT

Survey Goals

The primary intent of The National Association of Government Defined Contribution Administrators Perspectives in Practice Survey was to collect information that would provide members with new perspectives that could guide them in their continuing efforts to improve their plans and their participants' outcomes.

Methodology

The survey's methodology, form content, deployment and resulting reports were prepared by Industry Insights, Inc., working in close conjunction with the NAGDCA board, committee and staff.

In April 2017, an email was sent to NAGDCA members inviting them to participate in the 2017 NAGDCA Perspectives in Practice Survey. In addition to explaining the purpose of the project, the email contained instructions on how to participate and a link to a confidential online questionnaire. Multiple reminders were sent to non-participants by both NAGDCA and Industry Insights. Survey submissions went directly to Industry Insights' secure server and responses were accepted through May 31, 2017.

Upon receipt by Industry Insights, all questionnaires were assigned a confidential identification code and all survey data was then entered into a proprietary survey system, where the data were examined and edited by Industry Insights' data analysts for accuracy and consistency. The aggregate results were also reviewed by Industry Insights and NAGDCA personnel for reasonableness and, when necessary, survey respondents were contacted to clarify questionable data items. If the items were not able to be rectified, they were removed from the industry aggregates to avoid negatively impacting data validity.

Note: at no point did NAGDCA personnel ever have access to an individually identified plan's data unless the plan gave its specific permission.

In all, 52 useable submissions were received, **representing 52 plans, 37 plan sponsors, \$120 billion in plan assets and 2.5 million individual plan participants**.

The demographic characteristics of the sample are shown in the following table. (Note that in some cases, the individual sub-groupings will not add to 52, since not all forms contained responses for all data items.)

Using the Detailed Survey Results Tables in this report, members can compare their own agencies' operating characteristics and fee structures versus their peers in terms of the following data groupings:

^{*} Too few responses to show results

The statistical information contained in this report is believed to be representative of the plans responding to the survey. All reasonable efforts were taken by Industry Insights, Inc. to assure data comparability within the limitations of survey analysis and accounting reporting procedures. However, the data used in this report are not necessarily based on audited financial statements and the statistical validity of any given number varies depending on sample sizes and the amount of consistency among responses for that particular ratio. Industry Insights and NAGDCA, therefore, make no representations or warranties with respect to the results of this study and shall not be liable to clients, members, users or anyone else for any information inaccuracies, or errors or omissions in contents, regardless of the cause of such inaccuracy, error or omission. In no event shall Industry Insights and/or NAGDCA be liable for any consequential damages.

How to Use This Report

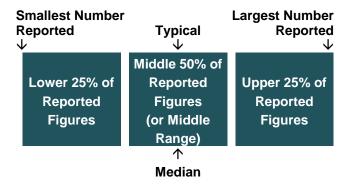

As mentioned, this National Association of Government Defined Contribution Administrators *Perspectives in Practice Survey Report* has been designed to help agencies evaluate their plans' performance relative to those of similar agencies in order to identify strengths, weaknesses and improvement opportunities. The statistics in this report represent broad performance "yardsticks" against which an agency's performance can be measured, and spotting significant differences between your own plan's characteristics and those of the industry composites can be the first step toward improving performance. However, please keep in mind the following:

- 1. The information in this report should be used as a tool for informed decision making rather than as absolute standards. Since plans differ as to their goals, type, size, and other factors, any two plans can be successful yet have very different experiences with regard to certain performance measures. For example, assessing fees should not be done in a vacuum. Plan type, plan size, quality of services, and investment products are some of the many drivers of fees.
- 2. A deviation between your plan's figures and those presented in this report is not necessarily good or bad. It merely indicates additional analysis may be required.
- 3. In situations where large deviations do exist, it may be helpful to go back and calculate the same performance measure over the past several years to identify any trends that may exist.

Understanding the Data

In order to use the information in this report to its maximum advantage, it is important to understand how the data are arranged and how to interpret the results.

Most of the numerical results included in this study are reported on the basis of medians rather than means (averages). Unlike a mean, a median is not distorted by a few unusually high or low values that may exist in the sample due to special circumstances. The median value represents the mid-point of the data for a particular measure, with one-half of the respondents reporting figures above it and one-half below. Each median was computed independently based on the respondents that reported for that item. As a result, mathematical relationships between medians do not always exist in the aggregate. For this reason, items that need to total will be shown as means (averages).

Data submitted by respondents were not used in the industry aggregates unless they were in accordance with the survey instructions and definitions and met certain reporting criteria. In cases where the number of respondents reporting was considered inadequate for the computation of a meaningful figure, ISD (Insufficient Data) or NA (Not Available) appear in the tables. Also, for several measures, including "Total Plan Assets," multiple figures are shown in the report because this figure was requested several different times in conjunction with related data.

Using Ratios

While it is important to analyze information in dollars and cents where applicable, it is essential that percentages and ratios be used if the data is to be compared to past performance or to reported standards. For example, while it is necessary for a plan to know its total fees in terms of dollars, in order to make comparisons against peer groups, it is helpful to look at fees as a percent of total plan assets.

Summary and Conclusions

While the volume of information contained in this report is very robust, by following the approach outlined below, your time and efforts can be channeled into an effective and beneficial analysis.

To summarize:

- **Step 1** Note that the same measures are presented in seven separate tables based on plan type, total plan assets, number of participants, etc. You can use data from whatever table is most useful for your specific purpose.
- **Step 2** Gather all your financial, operating, and fees figures for your latest fiscal year. (If you participated in this year's study, this has already been done.)
- Step 3 Calculate the various performance measures for your plan that are used in the report.
 (Again, if you participated in the survey and filled out the survey form completely, most of the calculations have already been made for you in your Plan Performance Report.)
- Step 4 Determine which data comparisons in this report are most comparable to your plan.
- Step 5 Use the information in this report to analyze your plan's strengths and weaknesses.

Even a relatively simple analysis of your plan's data using the information in this report for comparison can yield important insights into your plan and its operating characteristics.

SAMPLE PLAN PERFORMANCE REPORT (PPR) AND ONLINE REPORTING TOOLS

Participants in the *Perspectives in Practice Survey* will also receive, at no cost, a fully-customized *Plan Performance Report*. This confidential report displays a respondent's own data alongside the industry aggregations that best match their operations in order to facilitate benchmarking with similar industry peers. *This unique report is unavailable anywhere else and is a key benefit of participating in the*

survey.

In addition to receiving a *Plan Performance Report*, all survey participants also receive 24/7 access to a suite of interactive **Online Reporting Tools**. These tools allow users to drill deeper into the data and use multiple filters to create customized data aggregations beyond those contained in this report. Clickable graphs are available in the reporting tools that allow participants to compare their own data versus the filters they have selected, and the customized reports can be downloaded as an Excel or a PDF document. **Look for an announcement from NAGDCA regarding the availability of the customized report and online tool.**

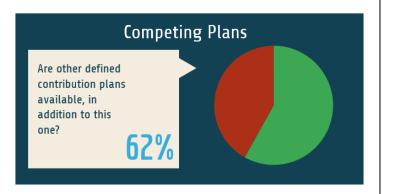

KEY SURVEY RESULTS INFOGRAPHICS

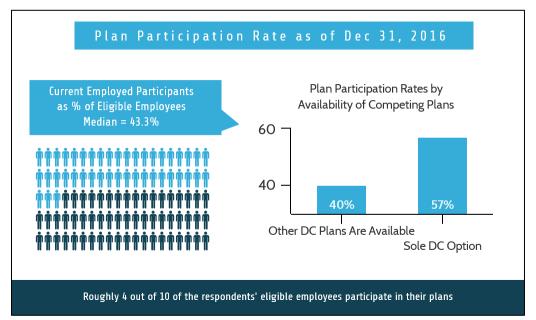

Total Plan Assets

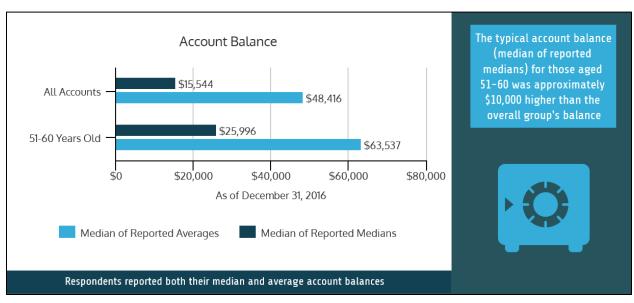

Respondents reported total plan assets of \$120.3 billion (Median: \$1.29 billion) as of Dec 31, 2016

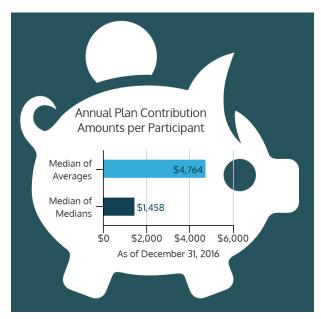

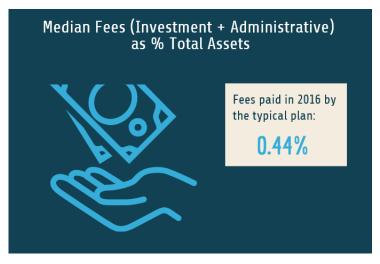

6 out of 10 valid respondents said other competing DC plans were available

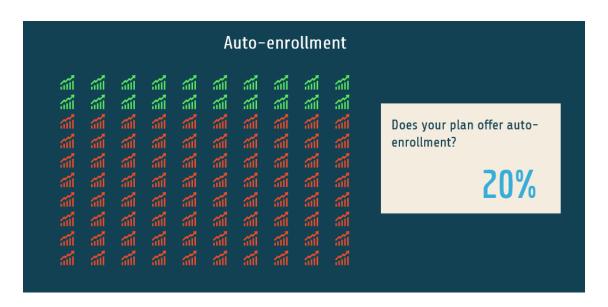

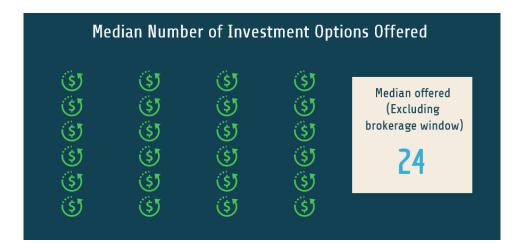

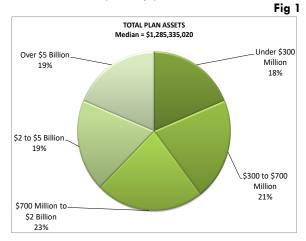

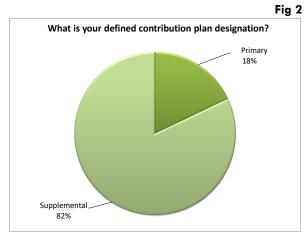

EXECUTIVE SUMMARY

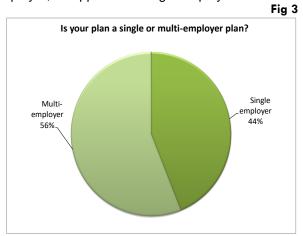

RETIREMENT PLAN ENVIRONMENT AND PLAN INDICATIVE DATA

As shown below, the "typical" survey respondent's plan had \$1.3 billion in total assets, and four out of five plans were designated as supplemental, so participants are also eligible for additional retirement benefits from their primary plan.

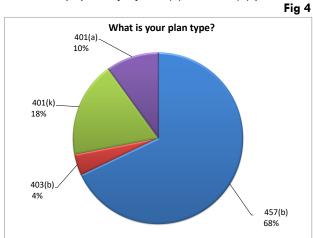

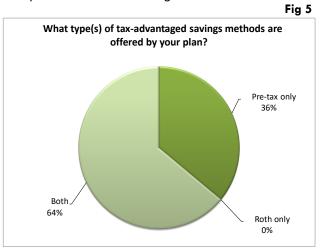

Over half of the participating plans were multiemployer, as opposed to single employer.

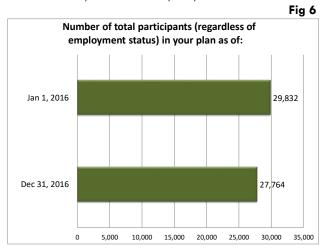

Almost 70% of the responding plans were 457(b), followed in popularity by 401(k) and 401(a) plans.

Just under two-thirds of the responding plans offered both pre-tax and Roth savings methods.

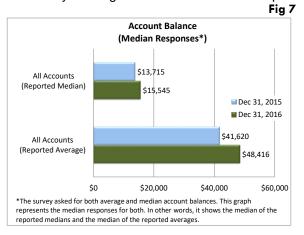

The median number of plan participants as of December 31, 2106 was 27,764, as shown below.

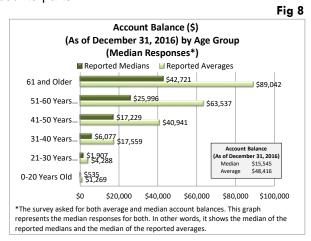

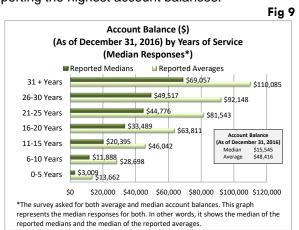

The median account balance reported by the surveyed plans across all accounts was \$15,545 for 2016, versus \$13,715 last year. In both years, the significantly higher average account balance was influenced by the largest account holders in the plans.

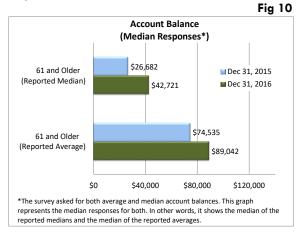

As was the case last year and would be expected, the median account balances for older plan members were substantially higher than those of their younger counterparts.

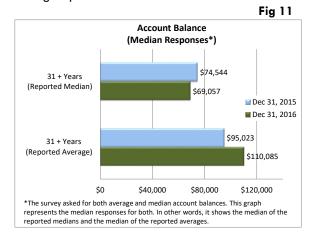

The same was true of account balances by years of service, with those having the longest tenure reporting the highest account balances.

For the oldest age group, both the reported mean and reported median account balances were higher in the current survey year than they were in last year's survey

In terms of tenure, the most seasoned group reported a higher average for 2016, while the reported median for this group was down somewhat.

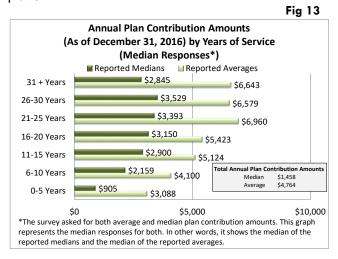

ELIGIBILITY, ENROLLMENT AND CONTRIBUTIONS

Due no doubt in part to their higher income levels and closer proximity to retirement, the older groups were also more likely to be contributing larger amounts to their plans.

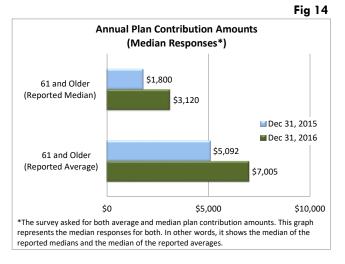

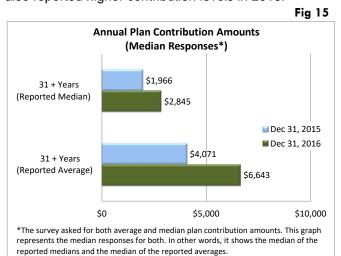

As in 2015, those with more years of service were also more likely to contribute higher amounts to their plans.

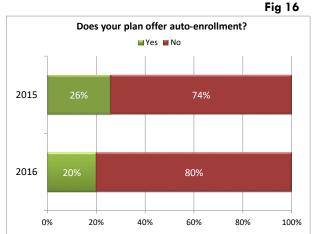

For the oldest age grouping, respondents contributed more in 2016 than in 2015.

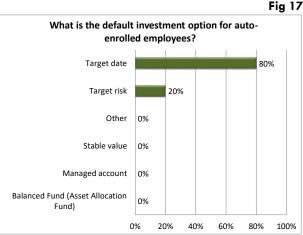

As with the oldest age group, the most tenured group also reported higher contribution levels in 2016.

One in five responding plans offered auto-enrollment (versus one in four in last year's survey)...

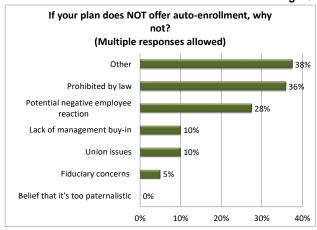

...and of those that offered auto-enrollment, target date funds were the most common default investments by far.

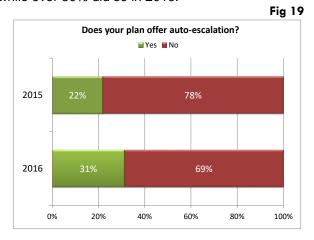

The reasons given for not offering auto-enrollment are shown below. Over one-third of the plans said they are prohibited by law from offering autoenrollment.

Fig 18

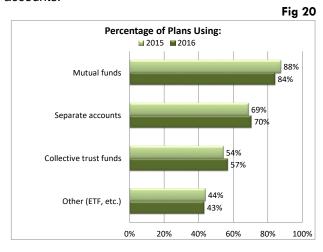

One in five plans offered auto-escalation in 2015, while over 30% did so in 2016.

INVESTMENTS

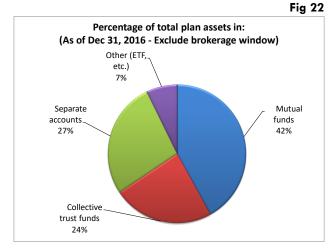

As shown below, almost nine out of 10 plans used mutual funds, while seven out of 10 used separate accounts.

In terms of the various asset classes held by respondents' plans, domestic large cap stocks, target date and stable value were the assets with the largest balances.

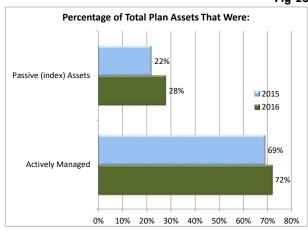

Just over 40% of all assets were in mutual funds. Separate accounts and collective trust funds now represent over half of all assets.

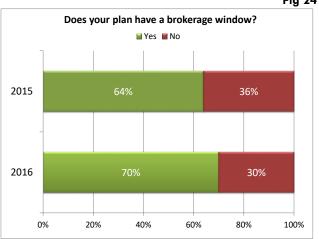

The percentage of plan assets that were actively managed was approximately 70% in 2015 and 2016.

Seventy percent of the responding plans had a brokerage window in 2016, but only 1% of the applicable respondents use it.

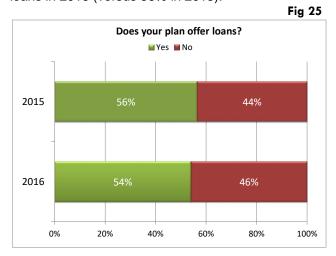

Fig 24

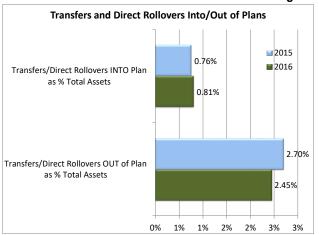

DISTRIBUTIONS AND WITHDRAWALS

Fifty-four percent of the responding plans offered loans in 2016 (versus 56% in 2015).

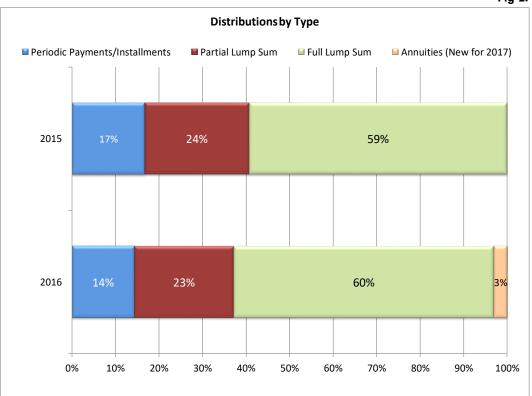

For 2015 and 2016, in terms of transfers and direct rollovers, more money flowed out of plans than into plans.

Fig 26

The breakdown of plan distribution types changed very little between 2016 and 2015, with 60% of the distributions being full lump sum.

Fig 27

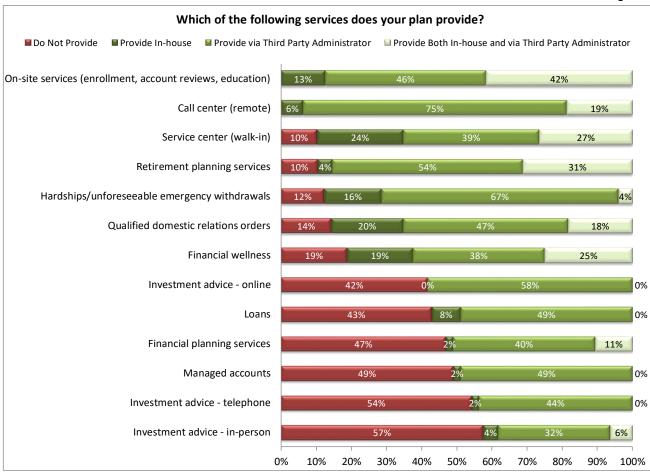

PARTICIPANT SERVICES AND ENGAGEMENT

The graph below shows the extent to which respondents' plans offered various services. As shown, all plans offered on-site services such as enrollment, account reviews and education, while fewer plans offered investment advice.

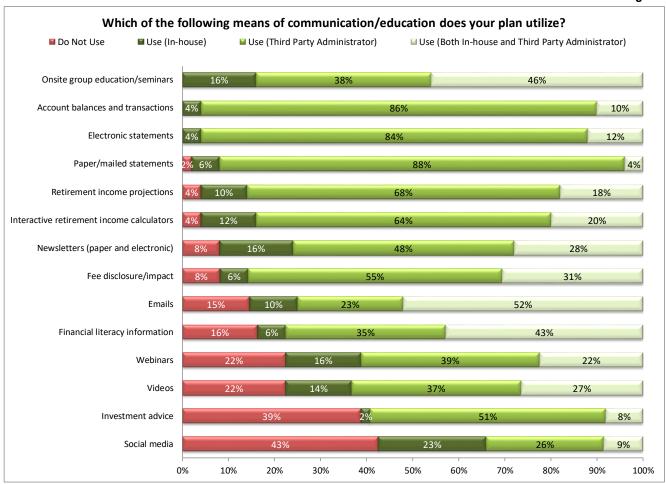

Fig 28

In terms of the extent to which respondents' plans utilize various means of communication/education, on-site group education/seminars, account balances and electronic statements were used by all responding plans, while fewer plans offered investment advice and used social media.

Fig 29

FEES

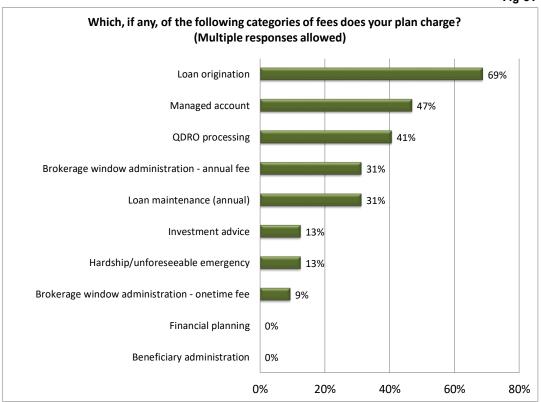

The table below illustrates the typical fees, both administrative and investment, paid by the responding plans. As shown, the larger plans in terms of assets tended to pay lower fees, as would be expected.

				Averages		
		Net Administrative Fees	Net Investment Fees	Net Investment Fees as % Assets	Net Administrative Fees as % Assets	Total Fees as % Total Assets
	All Respondents	\$1,595,108.5	\$3,047,434.7	0.27%	0.15%	0.42%
Total Plan Assets	Under \$300 Million	\$102,073.0	\$373,934.0	0.31%	0.24%	0.55%
Assets	\$300 to \$700 Million	\$781,754.0	\$1,337,442.5	0.31%	0.18%	0.49%
	\$700 Million to \$2 Billion	\$2,055,775.5	\$3,559,482.5	0.28%	0.14%	0.43%
	\$2 to \$5 Billion	\$4,676,449.0	\$7,820,383.7	0.23%	0.12%	0.34%
	Over \$5 Billion	\$5,857,084.0	\$14,740,100.5	0.21%	0.09%	0.31%

Finally, as shown below, almost seven out of 10 responding plans charged loan origination fees, while 47% charged managed account fees.

PLAN OVERSIGHT, GOVERNANCE AND STRATEGIC PLANNING		
Board/Committee Oversight		
Who provides your plan oversight? (Multiple responses allowed)		
Combined with Defined Benefit Plan oversight	16.0%	
Board/committee	92.0%	
Department/agency	16.0%	

How are the roles/responsibilities of your board/committee documented? (Multiple responses	s allowed)	
Charter	32.6%	
Bylaws	19.6%	
Other	52.2%	
No documentation	4.4%	
Number of members on the board/committee	9.0	7.0 - 9.
Are the board/committee members elected or appointed? (Multiple responses allowed)		
Elected	23.9%	
Appointed	91.3%	
Ex-officio	39.1%	
Does your plan have an Investment Policy Statement (IPS)?		
Yes	98.0%	
No	2.0%	
How frequently is the IPS reviewed?		
Annually	66.7%	
Every other year	2.1%	
No set schedule	27.1%	
Other	4.2%	
For which of the following does your organization have measurable goals for improvement? (Multiple responses allowed)		
Enrollments and participation	79.2%	
Savings rates	37.5%	
Leakage	31.3%	
Have no measurable improvement goals	18.8%	
Approximately how often does your organization issue RFPs/RFIs for a record-keeper/Third F	Party Administrator?	
Annually	0.0%	
Every other year	0.0%	
Every three years	6.0%	
Every four years	6.0%	
Every five years	58.0%	
Other	30.0%	
PLAN DOCUMENT		
How frequently is your plan document reviewed?		
Annually	36.0%	
Every other year	10.0%	
No set schedule	40.0%	
Other	14.0%	
Was your plan document individually designed from scratch or based on a prototype?		
Individually designed	77.1%	
Based on prototype	22.9%

PERSPECTIVES IN PRACTICE: A Benchmarking Initiative for Public Sector Defined Contribution Plans

Deadline: May 1, 2017

By submitting a completed survey, you will automatically receive a copy of the final industry report, as well as your customized Plan Performance Report and access to the online Searchable Results Tool.

NOTE: The information you supply on this questionnaire will be held in complete confidence by Industry Insights, Inc., the survey research firm that is compiling the survey data. Industry Insights has been processing confidential survey data for over 30 years, and only Industry Insights will ever have access to your individually identified responses.

Important Instructions - Please read before proceeding

- 1. Unless otherwise noted, all the information you provide on this questionnaire should pertain to the calendar year ending December 31, 2016. Please do not provide partial-year data.
- 2. For numerical responses, use the entire number and do NOT use abbreviations such as "M", "m", "K", etc.
- Unless otherwise instructed, do NOT truncate 000s and do not enter words such as "million" or ranges such as "5-10".
- 4. Fill in spaces in one of the following ways if possible: Fill in the data if you have it. If you do not have the requested data or it does not apply to your situation, you may leave the item blank. However, keep in mind that the more data you provide, the more useful your customized reports will be.
 - When instructed to do so, if the requested data is zero, please enter "0" (In these cases, leaving an item blank is not the same as indicating "0")
- 5. Throughout the form, you will see . Placing your cursor over this symbol will allow you to see helpful definitions. To maintain comparability, please review each available definition and tailor your responses accordingly, to the extent possible.
- 6. Throughout the form, you will also see boxes shaded in gray. These are items that we have calculated for you and are intended for your review. The data in these boxes can only be changed by changing their component items.
- 7. You may exit the survey at any time and return to it later. HOWEVER, DO NOT EXIT THE SURVEY BY SIMPLY CLOSING YOUR WEB BROWSER YOUR DATA WILL BE LOST! To save your data, you must click one of the following buttons:

"Save and Log Out"

"Next Page," "Previous Page," or "Save This Page and Continue Working on It" (located at the bottom of each form page)

Any of the Section Tabs at the top of each form page (other than the section you are currently on)

Occasionally clicking "Save This Page and Continue Working on It" is recommended, especially for longer pages, in case you should lose your Internet connection, have a power outage, etc. Also, the survey will automatically close after a long period of inactivity to protect your confidential data, so be sure to periodically save your work using one of the methods above.

- 8. The "Summary of Survey Status" table lists each section of the data input form. Clicking on a section will take you to that section, and the "status" column indicates whether or not that section has been completed. When you are finished with a section, be sure to click "Check here to indicate that you are finished with this section." This will update the "Summary of Survey Status" table with a green checkmark for that section.
- 9. After you have completed all survey sections, the "Summary of Survey Status" table will show buttons enabling you to print your completed form and submit it. Before submitting your final form, please review your responses to ensure accuracy. The more accurate your responses, the more accurate the industry benchmarks and your individual report will be.
- 10. Also, before submitting your final form, please print a copy of it for your records. (Important!)

If you have any questions concerning this survey, please contact:

- Tracy Tucker of NAGDCA
 - o ttucker@amrms.com
 - o 859-514-9210
- Steve Kretzer, Principal, Industry Insights, Inc.
 - skretzer@industryinsights.com
 - o 614-389-2100 x106

IMPORTANT: Please provide the following information so we know where to send your reports and whom to contact with questions about your survey responses.

The person identified below as the report recipient will receive access to the online report portal. If requested (i.e., the person listed as report recipient is unavailable), the primary member on file with NAGDCA will be granted this access as well. Beyond this, a plan may provide access to others at their discretion by sharing their login credentials.

Transfer: from one plan trustee to another, excluding service credit purchases. Can include plan to plan transfers between 457 plans of different employers. Employee must have severance from one employer and be employed by the other employer. Can also include exchanges between plan providers of the same employer.

Direct Rollover: trustee to trustee transfers, such as a transfer from an eligible plan to an IRA or another eligible plan when the account holder is eligible to receive a distribution.
