EQUITY RESEARCH

Research is the lifeblood of our organization

- Investment idea generation
- Professional development: focused mentoring effort nurtures investment talent—career analyst or portfolio management track

Fundamental approach to research—analysts are industry specialists across capitalization and style

- Understanding impact of all competitors within an industry group is key to assessing the outlook for any individual company
- Ideas leveraged across styles as valuation opportunities arise
- Environmental, Social and Governance considerations are integrated into our fundamental research

Formal and informal communication channels foster a collaborative research approach

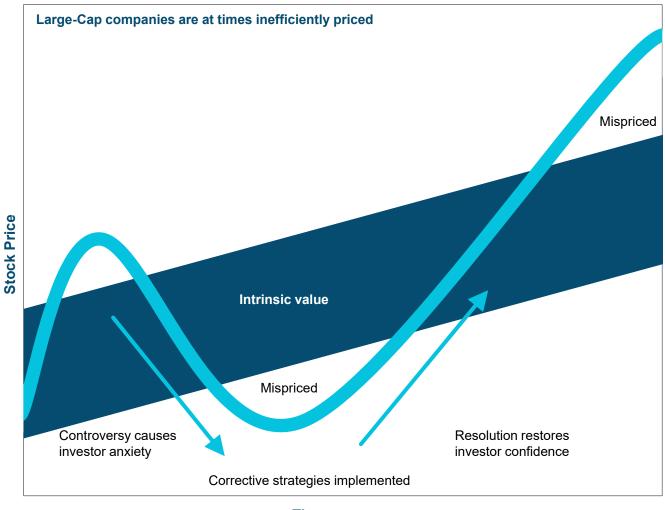

- Multiple signaling tools communicate analysts' conviction and urgency—company rankings,
 Research Management System (RMS), analyst portfolios, and weekly meetings
- Ongoing informal interaction between the portfolio managers and analysts is also central to the process

Rigorous performance and contribution review drives compensation

Key retention tools include performance-based bonus and equity participation

Extensive analyst interaction across industry groups, sectors, and asset classes promotes a broad perspective and timely decision making.

VALUE DISTORTIONS AND INVESTOR PSYCHOLOGY

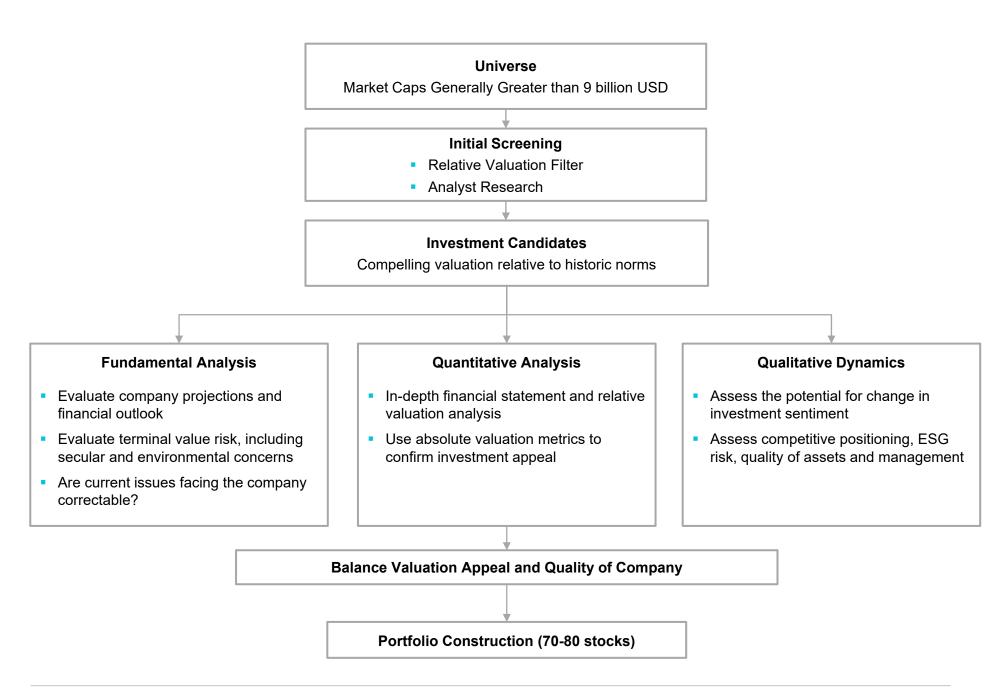

Time

Contrarian investors can benefit from changes in investor perception.

INVESTMENT PHILOSOPHY AND APPROACH

- Focus on relative value relationships to opportunistically identify attractively valued companies
- Fundamental research is key to uncovering companies with potential for stock price mean reversion
- A long-term orientation allows for the full exploitation of valuation anomalies
- Diversified portfolios help to manage portfolio risk profile

INVESTMENT PROCESS

INVESTMENT PROCESS

Buy Criteria

- Identify candidate companies whose earnings and dividend streams appear mispriced
- Integrate fundamental research assessment
 - Focus on improving financial outlook
- Apply qualitative overlay
 - Potential for improved investor perception
- Verify relative valuation anomalies through quantitative analysis
 - Focus on relevant valuation metrics
- Balance valuation analysis versus qualitative overlay

Sell Criteria

- Upside achieved—valuation gap narrows
- Significant change in fundamental assessment
- Deterioration in financial strength

PORTFOLIO CONSTRUCTION AND MONITORING

Diversified Portfolio Structure

- 70-80 stock portfolio
- Individual position sizes typically are below 3%, but higher conviction ideas can range to 5%
- Sector weights will typically vary from 0.5X to 2.0X, of the primary sectors of the Russell 1000 Value Index
- Reserves will typically range from 0% to 2%

Portfolio Monitoring

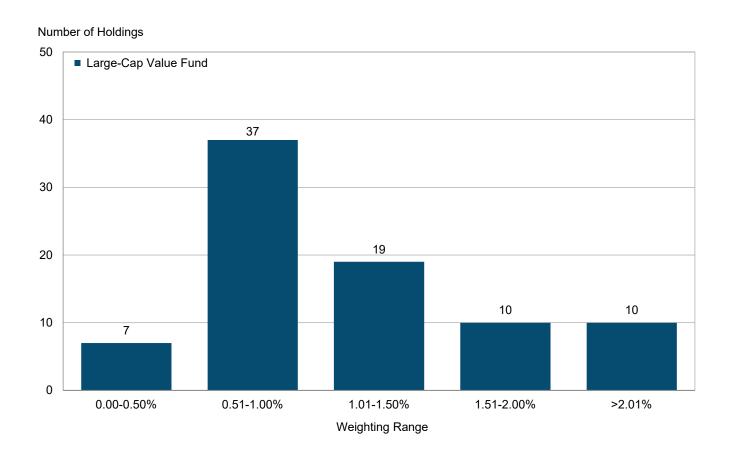

- Quarterly risk review with Risk Management team
 - Decomposition of active risk, factor exposures, and performance drivers
- Quarterly ESG review with Responsible Investing team
- Oversight by Equity Steering Committee
