Message: Two questions regarding the self funded health insurance plan. If this goes into effect in 2018 and it proves to not be a savings and health care for participants costs more than ETF has collected, What are the options planned or considered for payment for services? Are all of the following a risk... increased health care premiums, decreased/cut health care services to participants or payments of healthcare costs out of other funds that participants have paid into such as the WSR pension fund? Any information or resources you can provide would be appreciated. Thanks Kristen Ploc
