Considering obesity has become a public health concern that leads to other complications from heart disease to joint issues. The cost of these meds is a small fraction of the cost for care because of secondary diseases because of obesity.

It would be a disservice to the members of EFT that work in positions to serve the community and greater good, not be given access to medication that could provide them a longer life expectancy and quality of life.

Yours truly a family committed to serving the community.

Jamie Groark
