**Date:** March 1, 2021

**To:** Employee Trust Funds Board  
 Teachers Retirement Board  
 Wisconsin Retirement Board

**From:** Jim Guidry, Director  
 Benefit Services Bureau  
 Division of Retirement Services

**Subject:** 2020 Disability Statistical Report

**This memo is for informational purposes only. No Board action is required.**

Attached for your review is the 2020 Wisconsin Retirement System (WRS) Disability Statistical Report. The report provides information on disability annuity and duty disability activity for 2020 and a comprehensive view of the disability annuity, duty disability, Long Term Disability Insurance (LTDI), and Income Continuation Insurance (ICI) programs. We have provided information for calendar year 2020 and comparisons to previous years.

Notable items include the sustained increase in 40.63 applications since the reopening of the program in 2018. ETF saw a corresponding growth in claims started for the program during 2018 and 2019, but the growth is beginning to plateau as benefit payment initiation, which can take as much as a year from date of application, catches up with application submissions. Based on actuarial estimates, we anticipate the growth to continue, though not at the rates we've seen in the past two years.

We appreciate any feedback or suggestions that you may offer for future inclusion in this report. Please contact Jim Guidry at (608) 266-5387 or [jim.guidry@etf.wi.gov](mailto:jim.guidry@etf.wi.gov) if you have comments or questions.

Staff will be at the Board meeting to answer any questions.

***2020 Disability Benefit Statistical Report***

March 1, 2021

## Introduction

The 2020 Disability Statistical Report provides a statistical review of the 40.63 Disability Annuity (40.63), and 40.65 Duty Disability (40.65) programs for the calendar year. This report provides a review of benefit payments, the number of individuals receiving benefits, and other demographic data. The information is presented over a period of 10 years, depending on the veracity of available data and usefulness of that data. This report will provide a broad contextual review of the 40.63 and 40.65 programs to identify trends and comparisons with all of ETF's disability programs.

## Overview

The Department of Employee Trust Funds administers four disability programs under the authority of the Employee Trust Funds, Wisconsin Retirement (WR), Teacher's Retirement (TR), and Group Insurance Boards. These programs are the 40.63 Disability Annuity (40.63), 40.65 Duty Disability (40.65), Long-Term Disability Insurance (LTDI), and Income Continuation Insurance (ICI) programs. These programs combine for annual benefit payments of \$241.5 million for 11,085 separate claims as of December 31, 2020<sup>1</sup>. The 40.63 program commands the largest share of disability payments with 62.7% of disability payments and 58.1% of all active claims (Exhibit 1).

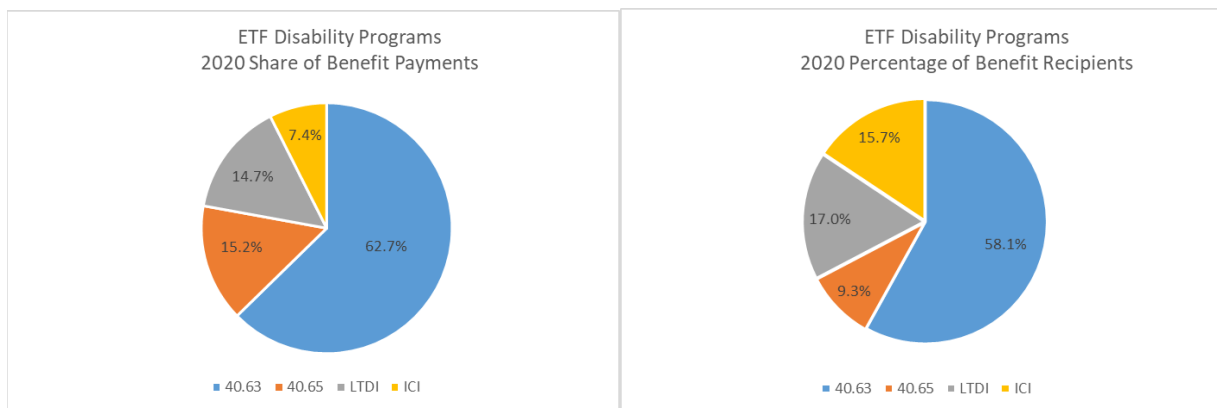

Exhibit 1

Exhibits 2 and 3 compare disability benefit payments and the number of claimants over a ten-year period from 2011 to 2020 for all four disability programs. Annual 40.63 benefit payments exceed the combined payments of the other three programs (40.65, LTDI, and ICI). Likewise, the number of 40.63 recipients exceeds that of the other three programs combined (Exhibits 2 and 3).

<sup>1</sup> Some individuals may be receiving more than one WRS disability benefit.

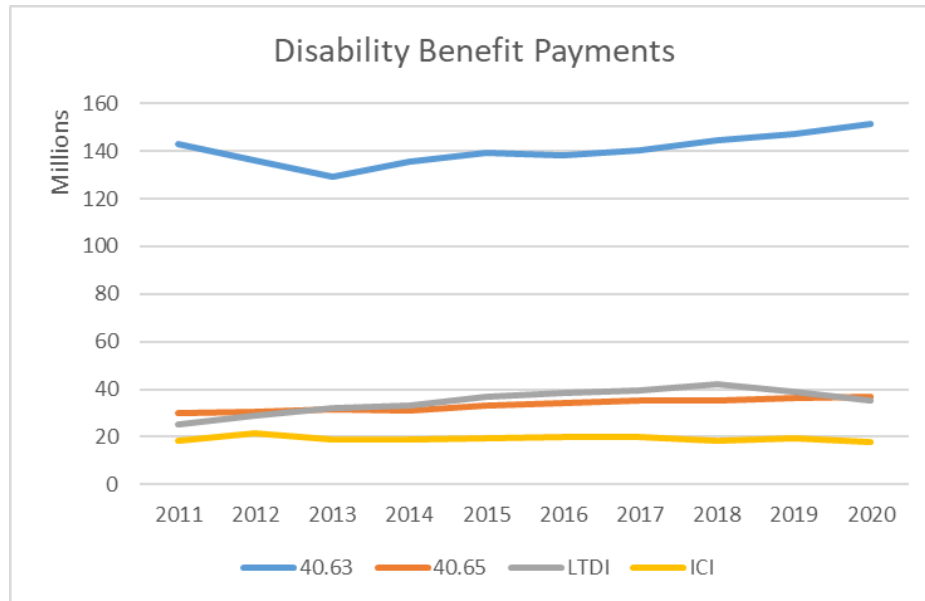

Exhibit 2

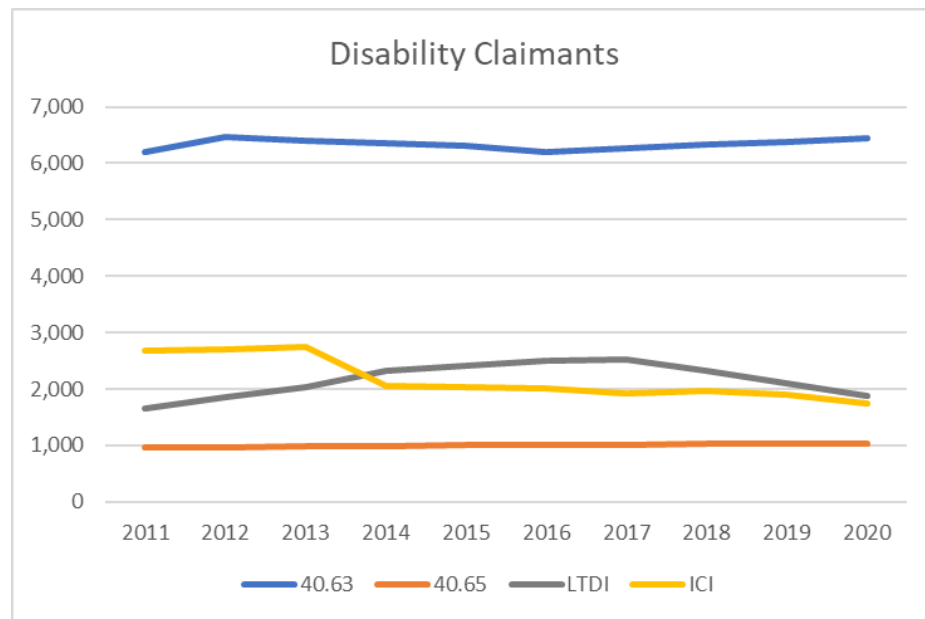

Exhibit 3

The 40.63, LTDI, and long-term ICI programs pay benefits if an employee is unable to engage in any substantial gainful activity by reason of a medically determinable physical or mental impairment that can be expected to result in death or to be of a long-term or indefinite duration. 40.65, Special 40.63, Special LTDI benefits (all for protective occupation participants only), as well as short-term ICI benefits, are payable if an employee is unable to perform the duties of

their current occupation. Short-term ICI benefits last for up to 12 months and may transition into long-term ICI benefits if the employee remains disabled as defined under the plan provisions.

All ETF-administered disability benefit applications require at least one (ICI) or two (40.63, 40.65, LTDI) medical reports from physicians certifying that the employee meets the program's definition of disabled. Disability benefit applications also require documentation from the employer. The ICI, LTDI, and 40.63 disability programs may require annual medical recertification.

Some examples of the differences between programs include different benefit eligibility rules (e.g. service requirements), benefit durations, annual adjustments, voluntary vs. automatic enrollment in programs, and the treatment of protective occupation participants.

## **ETF Disability Benefit Programs**

**Disability Annuity (§40.63).** Disability annuities are issued under the authority of the TR and WR Boards and are available to all WRS employees who have at least one-half year of creditable service in five of the previous seven calendar years.

An individual is eligible to apply for 40.63 benefits until they reach normal retirement age, and benefits are paid for an annuitant's lifetime. An individual must be totally disabled by a mental or physical impairment, which is likely to be of a long-continued and indefinite duration. Protective occupation participants who are not totally disabled can qualify for Special 40.63 benefits if they have at least 15 years of accumulated service, are between 50 and 55 years old at the time the disability occurs, and their disability causes them to no longer be able to perform their protective occupation duties. 40.63 benefits are paid in the form of a disability annuity that is determined using a combination of an annuitant's creditable service and a period of assumed service up to the individual's normal retirement age. Disability annuities most resemble a regular WRS retirement annuity and include similar death benefits, depending on the annuity option selected. 40.63 benefits can be suspended if an annuitant has earned income above an established earnings limit (\$16,267 for 2020, indexed annually).

In 2020 total benefit payments for the 40.63 program were \$151.4 million. This amount was a 3% increase in benefit payments from 2019 and a 5.85% increase in total benefit payments since 2011. Total benefit payments declined 13.6% from 2008 to 2013 due to negative annual benefit adjustments but have increased 17.32% since then.

As of December 31, 2020, there were 6,437 annuitants receiving a benefit under 40.63. Total annuitants receiving a 40.63 benefit in 2020 increased 0.99% from the previous year and has increased 3.81% since 2011. The average monthly 40.63 benefit in 2020 was \$1,960, an increase of 1.99% from 2019 and an increase of 1.97% since 2011 (Exhibit 4).

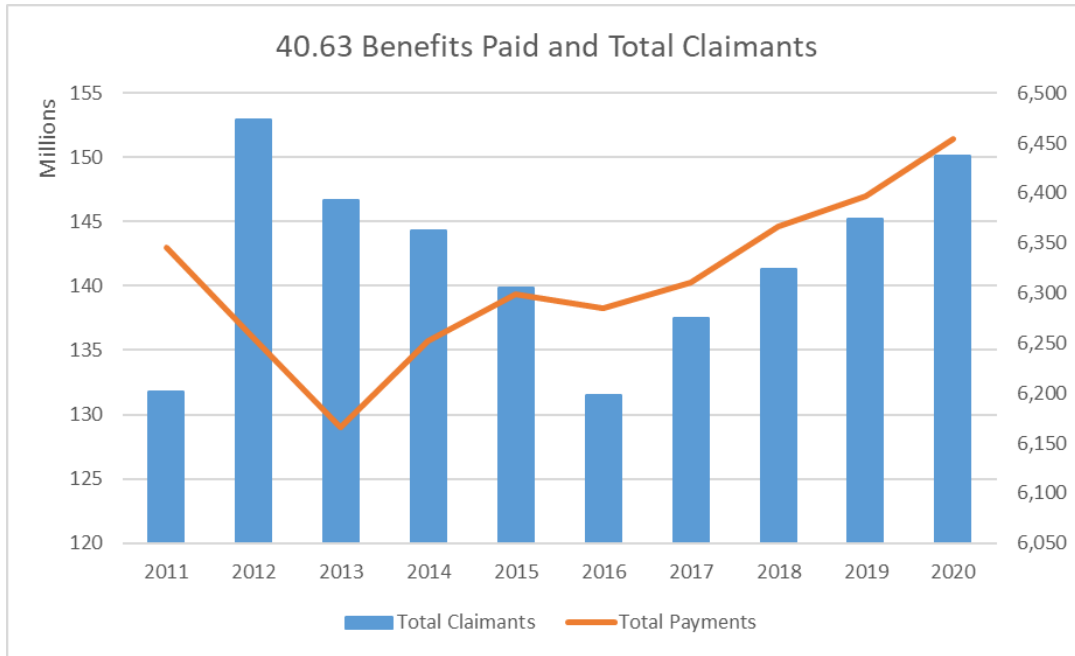

Exhibit 4

**Duty Disability Benefits (§ 40.65 and § ETF 52).** Duty Disability is an income replacement program that is available to all WRS protective occupation participants, such as police officers, fire fighters, and correctional officers. This benefit is entirely funded by employer contributions. An individual must be permanently disabled by a work-related injury or disease and can no longer work full protective duty. There are approximately 22,300 active protective occupation participants in the WRS system and 7,400 inactive.<sup>2,3</sup> The 40.65 program is under the authority of the WR Board.

Duty Disability is not a retirement or annuity benefit. The benefit for 40.65 is calculated as a percentage of income, either 75% or 80%. Other sources of income, such as WRS benefits (e.g. retirement, separation, 40.63, and LTDI), Social Security benefits, earned income, Unemployment Insurance, and Worker’s Compensation benefits will reduce Duty Disability benefits. The 40.65 benefit is a lifetime benefit.

The 40.65 program paid \$36.7 million in benefits in 2020, a 0.53% increase from 2019 and an increase of 22.37% since 2011. The number of members receiving a 40.65 benefit was 1,026 as of December 31, 2020, the same number as in the previous year and an increase of 7.21% since 2011. The 2020 average monthly benefit payment for 40.65 was \$2,978, an increase of 0.53% from 2019 and an increase of 14.14% from 2011 (Exhibit 5).

<sup>2</sup> Inactive protective occupation participants are eligible for 40.65 benefits if they meet the eligibility criteria.

<sup>3</sup> All census information for 40.63, 40.65, and LTDI is from *Wisconsin Retirement System (WRS) 39<sup>th</sup> Annual Actuarial Valuation and Gain/Loss Analysis as of December 31, 2019*.

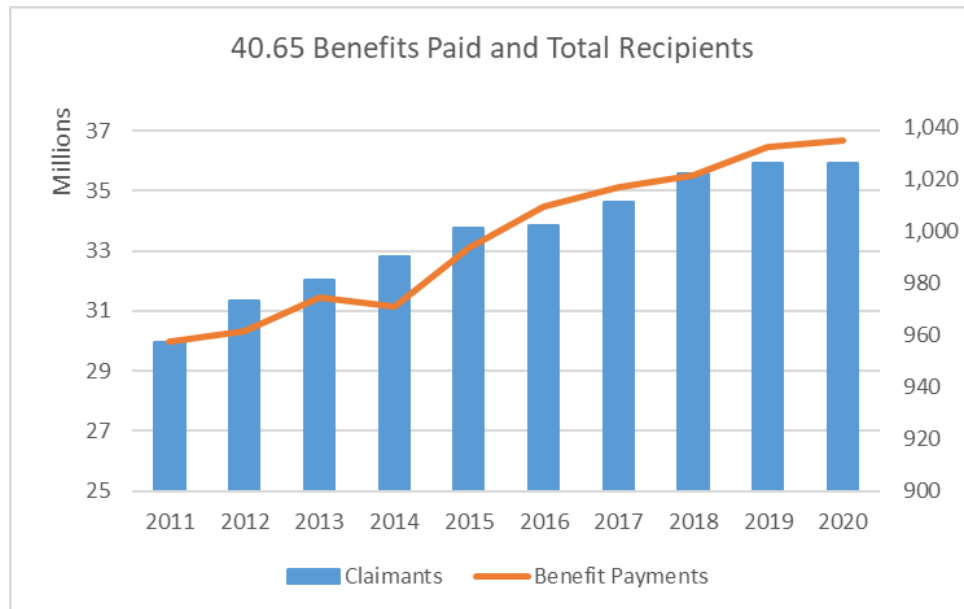

Exhibit 5

**Long-Term Disability Insurance (§ ETF 50.40).** The LTDI program closed to all new claims on January 1, 2018 as part of ETF’s disability programs redesign project, a multi-year effort to streamline ETF’s disability programs to make them more sustainable, administratively efficient, and less redundant. Up until that point, the LTDI program was being administered by a third-party administrator, Aetna (now doing business as The Hartford). The program closure provided ETF with an opportunity to bring the management of the existing LTDI claims in-house. As of January 1, 2018, there were 2,548 existing LTDI claims transferred to ETF from Aetna that will be run out to claim termination. It is estimated that it will take approximately 32 years to run out the existing LTDI claims.

LTDI benefits are payable to age 65 for most recipients. Depending on the individual’s age when applying for LTDI, the benefit may be available beyond age 65. The basic monthly LTDI benefit is 40% of an employee’s final average salary (FAS) or 50% for ineligible for Social Security benefits. In addition to the basic LTDI benefit, a supplemental contribution of 7% of FAS is added to an employee’s WRS retirement account for each month an LTDI benefit is received as long as no WRS benefit has been taken from the member’s account. LTDI recipients who receive 40.65 benefits or earn creditable service with a WRS employer are also ineligible for supplemental benefits. LTDI benefits are offset (reduced) by any WRS retirement or separation benefits the individual is receiving or is eligible to receive. LTDI benefits will be suspended for exceeding the annual earnings limit the first time and will be terminated for exceeding the earnings limit a second time. Special LTDI benefits will not be terminated for

exceeding the earnings limit, regardless of the number of occurrences. The earnings limit for LTDI benefits is the same limit used by the 40.63 program.

Authority for the LTDI program was originally delegated to the Group Insurance Board by the Employee Trust Funds Board. The ETF Board resumed oversight of the LTDI program beginning in 2017.

**Income Continuation Insurance (§40.61, §40.62, and § ETF 50.10).** ICI is available on a voluntary basis to all state employees, and to local government employees if their employer offers coverage. It provides short-term (one year or less) and long-term (greater than one year) replacement income for disabilities. Short-term disability payments make up 37.4% of all ICI benefit payments. There are approximately 60,000 state and local government employees with ICI coverage.

ICI benefits provide up to 75% of an employee's average monthly earnings based on previous calendar year earnings. Standard ICI covers up to \$64,000 of annual earnings (\$4,000 maximum monthly benefit). Employees may also enroll in supplemental coverage which provides additional coverage up to \$120,000 of annual earnings (\$7,500 maximum monthly benefit). ICI benefits are payable to age 65 for most recipients.

ICI premiums are paid by employees and employers and, for most state employees, are calculated based on the amount of sick leave they've accumulated. For University of Wisconsin faculty and academic staff and local government employees, the premium is based on an elimination period selected by the employee.

ICI benefits are offset by numerous other benefits received by the employee including certain Worker's Compensation benefits, third-party liability awards, Social Security benefits, Unemployment Compensation, WRS benefits, and earned income. Individuals are required to repay duplicate benefits back to the ICI program.

The ICI program is administered by a third-party administrator (currently The Hartford) and is under the oversight of the Group Insurance Board.

As part of ETF's disability programs redesign effort, a multi-year effort to streamline ETF's disability programs to make them more sustainable, administratively efficient, and less redundant, ETF and Milliman recommended design changes to the State ICI program that addressed declining enrollment, attempted to lower premiums, reduce the actuarial liability, and reduce the complexity and administrative burdens of the program. In light of feedback received on the original package that was reviewed by the Governor and the legislature, ETF revised its proposal and prepared legislative changes that would decouple sick leave from the state ICI program and replace it with an elimination-period based program resembling the local ICI program. Currently sick leave balances play a part in determining state employee ICI

premiums, and UW and state employees are required to exhaust up to 130 days of sick leave before ICI benefits can begin. The statute changes would remove these requirements.

Other changes prepared include removing the requirement for UW faculty and academic staff to have 12 months of service before becoming eligible for an employer contribution to the ICI premium and shifting the oversight of the ICI program from the Group Insurance Board (GIB) to the ETF Board.

All of these items were proposed in the ETF budget request forwarded to the Governor's office, however, only the board oversight changes were included in the budget bill forwarded by the Governor to the Legislature in February.

## **Trends in Disability Benefits**

Annual adjustments made to the 40.63 benefit are based on the same core annuity and variable annuity dividend percentages as monthly WRS retirement annuities. LTDI adjustments are based on the core annuity dividend only. These benefit adjustments have seen successive declines beginning in 2008 and returning to positive adjustments in 2013. The LTDI program, while experiencing the same negative adjustments, did not experience the same overall decrease in annual benefit payments due to the growth in the number of benefit recipients. Also, negative adjustments to LTDI benefits have been mitigated by maximum benefit reduction rules that prohibit disability payments from decreasing below their original amount. These same reduction rules also apply to 40.63 benefits, however existing 40.63 benefits are generally older (of longer duration) than the existing LTDI benefits and, due to previous increases, had farther to decrease before reaching the minimum benefit level.

40.65 Duty Disability benefits, on the other hand, are adjusted annually by an amount equal to the previous year's salary index (same as the Social Security salary index) or by the previous year's core annuity dividend, depending on the member's age (60 or older) and qualification for other WRS disability benefits. In recent years the salary index has only decreased once, by 1.5% in 2011.

ICI benefits do not experience annual adjustments.

The primary distinction between the 40.63 program and the LTDI program is that 40.63 is a lifetime benefit while LTDI benefits end at age 65 for most recipients. Once an LTDI benefit is terminated due to age, a recipient may begin receiving a WRS retirement benefit if they have not already taken a WRS benefit. For 40.63 annuitants, their annuities continue until death, with additional potential death benefits which do not exist in the LTDI program. 40.63 annuities are not converted to WRS retirement annuities at normal retirement age even though they are similarly administered.

40.63 benefit payments and claimants have declined modestly since 2008, however with the closure of the LTDI program and the subsequent reopening of 40.63 on January 1, 2018, 40.63 benefits have begun to increase. ETF's disability actuaries projected that the number of active 40.63 claims would increase by approximately 300-330 claims annually suggesting that, while the growth has slowed this year, the program may experience continued growth in future years.

A total of 604 disability annuity estimates were completed in 2020, representing a decrease of 16.8% from the prior year's numbers. 40.63 disability annuity benefits that were started in 2020 totaled 295, a 4.2% increase over the prior year. (Exhibit 7).

Exhibit 7

Disability annuity claims have historically been filed primarily by claimants age 51-60. This age group accounted for approximately two thirds of all 40.63 disability annuities started between 2011 and 2017. Due, in part, to the reopening of the program to all eligible employees, claimants age 51-60 made up only about half of the disability annuities started in the last two years. This year, however, the 51-60 age range again accounts for 65.6% of all 40.63 disability annuities started, due primarily to a substantial increase this year in the number of TR claims filed by claimants in the 56-60 age group.

The number of claimants ages 45 and under has decreased this year, but still maintained most of the gains made in the prior two years. Between 2011 and 2017 this group averaged 2.5% of the total number of claims. Since 2018, claimants under age 45 have averaged 13.4% of all claims. In 2020, this group represents 8.6% of all 40.63 disability annuities (Exhibits 8 and 9).

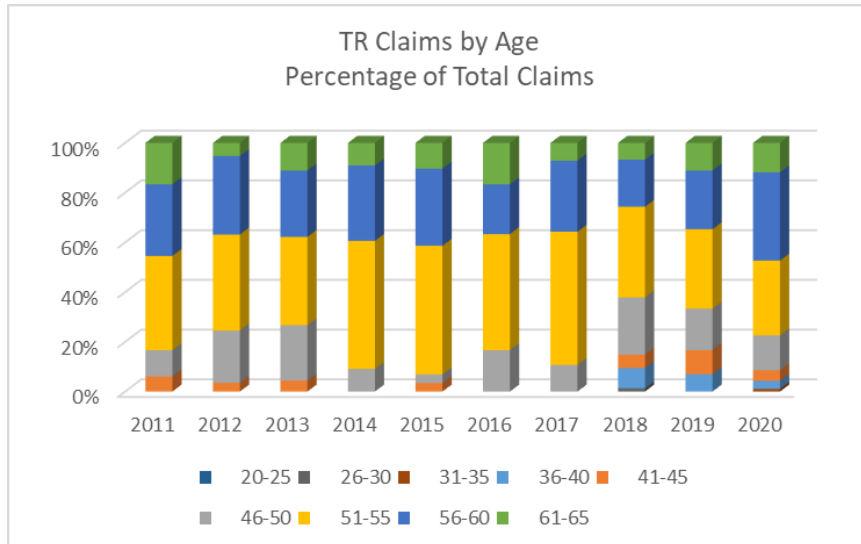

Exhibit 8

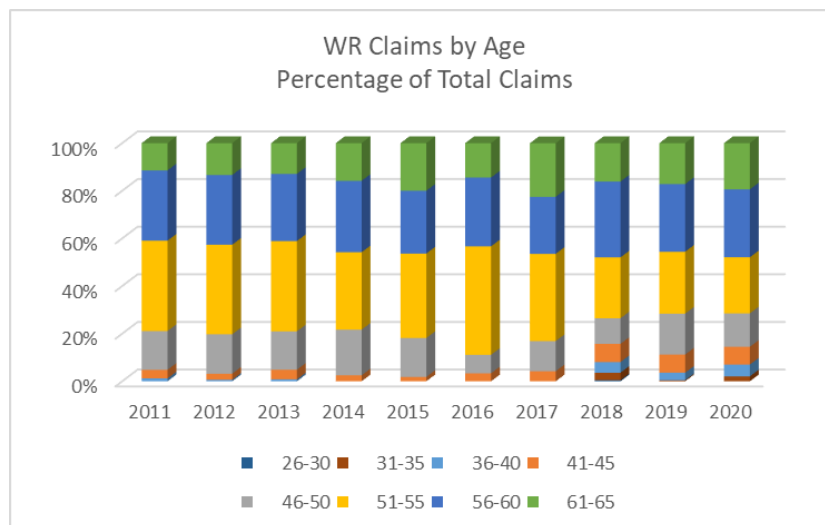

Exhibit 9

The ICI program, on the other hand, shows a much broader distribution of claims by age range. This is indicative of the short-term component of the ICI program, and the previous inability of employees to apply for 40.63 benefits based on hire date (Exhibit 10).

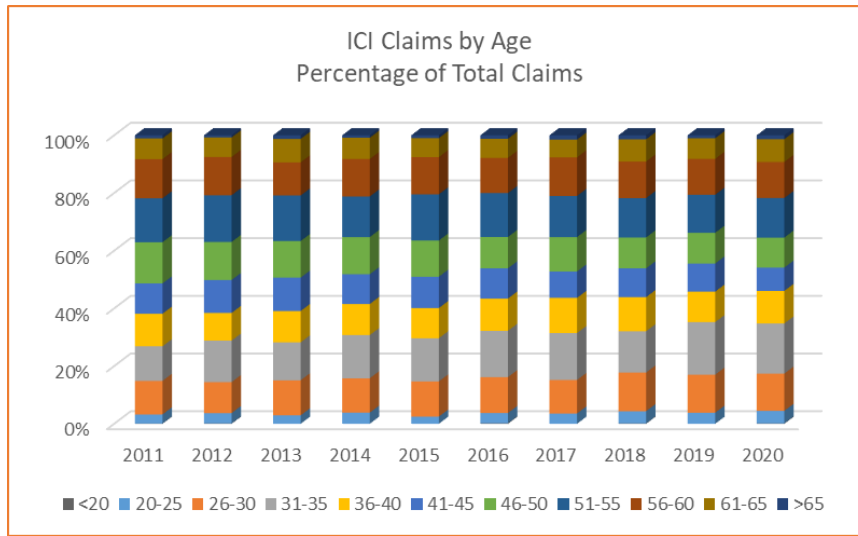

Exhibit 10

The primary disability types for the 40.63 program in 2020 are multiple medical problems, cancer, neurology, orthopedic, and mental illness.

Teachers Retirement Board claims for neurology increased, while cancer, multiple medical problems, mental illness, and orthopedic issues showed slight decreases. Cancer claims again comprise the greatest percentage of these claims in 2020 (26.9%), followed by multiple medical problem claims (22.6%) (Exhibit 11).

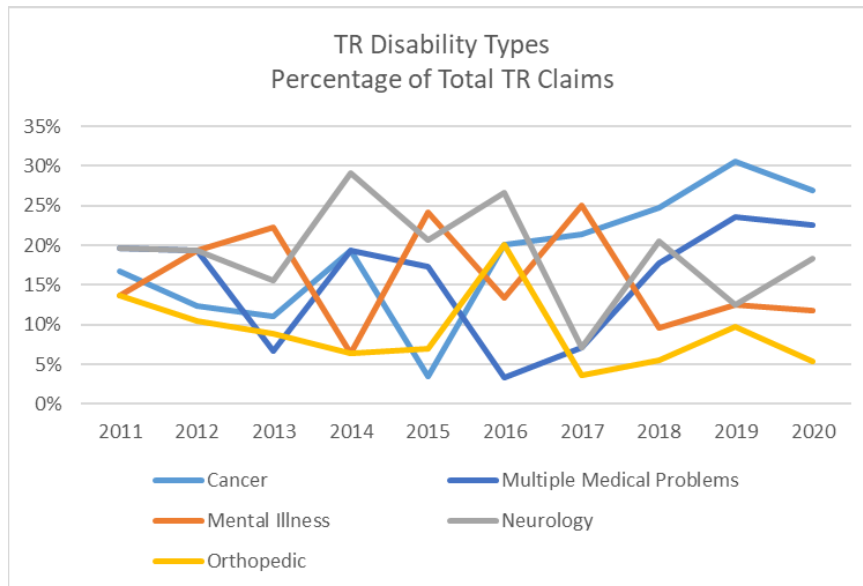

Exhibit 11

For Wisconsin Retirement Board disability annuity claims, orthopedic claims continued to decrease, while cancer and neurology claims remained near 15%. Multiple medical problems and mental illness claims remained stable compared to the prior year's numbers. Multiple medical problems again comprised the greatest percentage of all claims in 2020 (24.8%), followed by neurology, orthopedic, and cancer claims (14.5, 13.6, and 13.2%, respectively) (Exhibit 12).

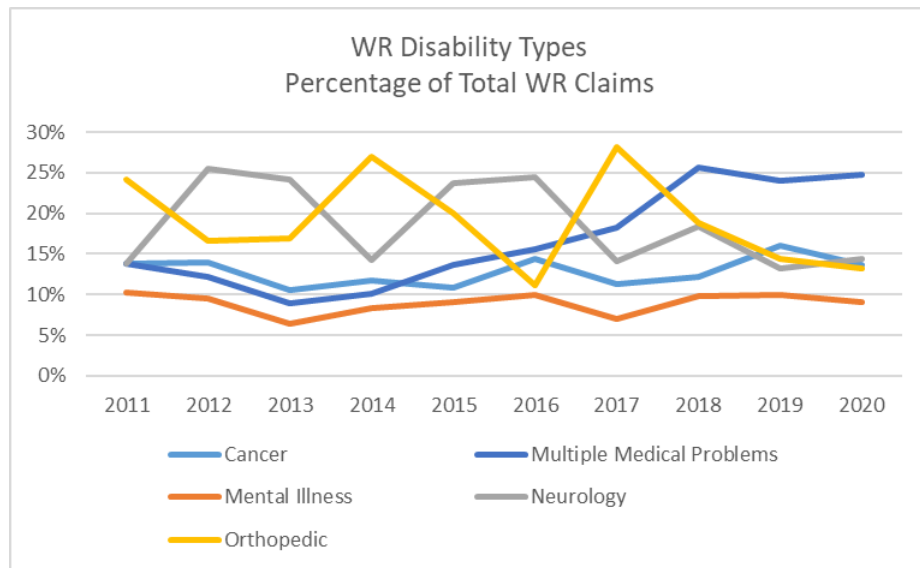

Exhibit 12

There were 20 duty disability benefits started in 2020. The primary disability type for these claims was musculoskeletal issues (55.0%), followed distantly by psychiatric, neurological, and multiple medical problem claims (all at 10.0%). There is a large amount of volatility in other disability types for this program, due to the relatively small number of claimants (Exhibit 13).

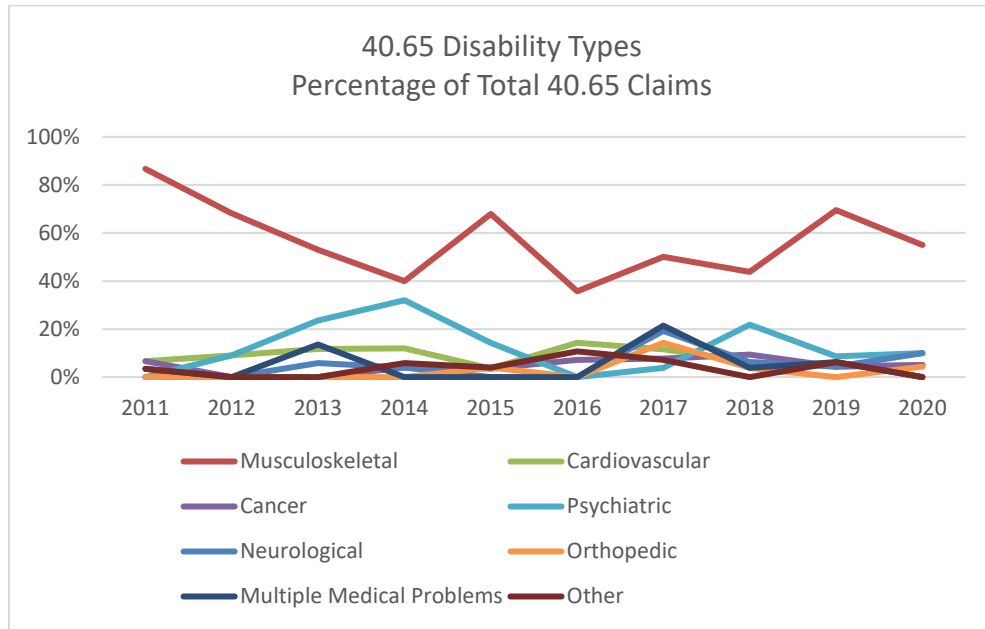

Exhibit 13
