Section 10 - Retirement Benefit Projections
When you retire, you are entitled to the higher of a Money Purchase or a Formula retirement benefit. These calculation methods are based on various factors.

	Money Purchase Benefit	Formula Benefit
• Age at retirement		
• Account balance at retirement		
• Employee Contributions		
• Employer Matching Contributions		
• Accumulated Interest		
• Final average monthly earnings		
• Employment category(ies)		
• Years of service		
• Reduction if retiring prior to normal retirement age		
• Adjustments due to participation in the Variable Trust Fund		

The projections below reflect your earliest possible retirement age and the age when you can receive an unreduced benefit (no reduction because of age).

	55	65
Monthly Money Purchase Benefit	\$688 *	\$828 *
Monthly Formula Benefit	\$1,005 *	\$1,182 *

*These unofficial amounts do not reflect future benefits. They are based on your account balances as of January 1, 2019. To project future retirement benefits using this statement, visit the [Retirement Calculator at etf.wi.gov/calculator.htm](http://etf.wi.gov/calculator.htm).

*Amounts reflect the highest payment option available that does not protect a beneficiary. At retirement, you will be given other options that do provide death benefits.

*These projections do not include any applicable voluntary additional contributions in Section 4.

*If your earnings or monthly benefit exceeds federal limits under IRC 401(a)(17) or 415(b), your final retirement benefit may be restricted. This determination can only be made upon retirement.
