ETF has made every effort to ensure that this brochure is current and accurate. However, changes in the law or processes since the last revision to this brochure may mean that some details are not current. Visit etf.wi.gov to view the most current version of this document. Contact ETF if you have any questions about a particular topic in this brochure.

ETF complies with applicable federal civil rights laws and does not discriminate on the basis of race, color, national origin, age, disability, sex, sexual orientation, or gender identity in the provision of programs, services or employment. For more information, see ETF's *[Nondiscrimination and Language Access \(ET-8108\)](#)* available at etf.wi.gov. To request this information in another format, call 1-877-533-5020 (toll free). We will try to find another way to get the information to you in a usable form.

Eligibility

To be eligible to receive a Wisconsin Retirement System retirement benefit, you must meet all of the following conditions:

1. You must be vested¹ and at least age 55 (age 50 if you have protective category service that is not purchased).
2. You must terminate all WRS-covered employment.
3. You must remain terminated from all employment with a WRS employer that meets WRS-participation standards until the 76th calendar day after termination.

If you return to work for the same WRS employer from which you retired, the required break in service applies to all WRS employment regardless of whether it meets WRS-participation standards.

4. You must not be on a leave of absence or in temporary layoff status.
5. You must complete, sign, and return a *Retirement Benefit Estimates and Application* (ET-4301) to ETF. Incomplete applications will be rejected. If your application is rejected, the date ETF receives an acceptable (complete) application will determine the effective date your retirement benefits can begin.
6. ETF must receive your completed application prior to your death.

If you terminate WRS employment due to a disability, you should contact ETF about eligibility for disability benefits *before* you apply for a retirement benefit. Taking a retirement benefit may affect eligibility for disability benefits.

¹You may have to meet one of two vesting laws depending on when you first began WRS employment:

- If you first began WRS employment after 1989 and terminated employment before April 24, 1998, then you must have some WRS-creditable service in five calendar years.
- If you first began WRS employment on or after July 1, 2011, then you must have five years of WRS-creditable service.

If neither vesting law applies, you were vested when you first began WRS employment. If you are vested, you may receive a retirement benefit at age 55 (age 50 if you have protective service that is not purchased) once you terminate all WRS employment. If you are not vested, you may only receive a separation benefit.

Part-time elected officials age 55 (age 50 for protective category) or older who have other WRS service may irrevocably waive that coverage if terminating all other WRS-covered employment. If this applies to you, a [Waiver of Part-Time Elected Service \(ET-4303\)](#) form is available at etf.wi.gov or from ETF.

Retirement Benefit Calculation Methods

WRS benefits are calculated using two methods:

- the formula method, and
- the money purchase method.

ETF calculates your benefit using both methods and automatically pays you the higher amount. Under both methods, any gain or loss from Variable Trust Fund participation and any additional contributions you made are reflected in the calculations.

A **formula** monthly retirement benefit is calculated using:

- your final average monthly earnings,
- your total years of creditable service (including military service credits, if applicable),
- the formula multiplier(s) for your service and employment categories, and
- any age reduction factor(s) based on your age at retirement.

For more information regarding formula method calculations, see pages 5-9 of this brochure.

A **money purchase** monthly retirement benefit is calculated by multiplying your current total contributions (employee- and employer-required contributions, plus accrued interest) by an actuarial factor based on your age when the annuity begins. Your money purchase balance is reported on your annual *Statement of Benefits*.

For more information regarding money purchase calculations, see pages 17-19 of this brochure.

Online Calculator for Retirement Estimates

The *WRS Retirement Benefits Calculator* is available online at etf.wi.gov. This calculator will project what your future retirement benefit may be. Enter the data elements for a formula and money purchase calculation. The higher of the two calculations will be displayed when you enter data for both methods. For a money purchase calculation, enter a projected total balance as of each future effective date.

See the *Calculate Your Formula Benefit* and *Calculate Your Money Purchase Benefit* sections in this brochure for more information.

Annuity Payment Options

When you apply for a WRS monthly lifetime retirement or disability benefit (an annuity), you may choose one of the following payment options:

- For Annuitant's Life Only
- Life Annuity with 60 Payments Guaranteed
- Life Annuity with 180 Payments Guaranteed
- Joint and Survivor Annuity, 75% Continued to Named Survivor
- Joint and Survivor Annuity, 100% Continued to Named Survivor
- Joint and Survivor Annuity, Reduced 25% on Death of Annuitant or Named Survivor
- Joint and Survivor Annuity, 100% Continued to Named Survivor with 180 Payments Guaranteed

You have a choice of annuity options, unless your account is too small for a monthly benefit. Your eligibility for a one-time, lump-sum payment versus a monthly payment depends on the size of your *For Annuitant's Life Only* benefit. Annual minimum and maximum amounts are determined by state statute as modified by federal law. See the current rates at etf.wi.gov.

- If your monthly annuity is less than the minimum amount, you are restricted to a one-time, lump-sum payment.
- If your monthly annuity is at or above the minimum amount, but less than the maximum amount, you may choose between a lump-sum payment or a monthly payment.
- If your monthly annuity is greater than the maximum amount, you are not eligible for a lump-sum payment and may only take a monthly payment.

The annuity option selected will determine whether benefits will be payable after your death.

Accelerated Payment Options

Accelerated payments are intended to provide you with approximately the same income from your WRS annuity alone (prior to age 62) as your combined income from the WRS and Social Security after age 62.

Accelerated payments consist of two components: a lifetime annuity payment and a *temporary* payment that ends once you reach age 62.

Accelerated payments are normally available if your retirement annuity begins before age 62 and your *For Annuitant's Life Only* after-age-62 payment meets the annual monthly minimum requirement. The same annuity options are available, but they include an accelerated payment provision.

With an accelerated option, you would receive a temporary increase to your monthly WRS annuity payment until the month following the month you reach age 62.

For example, if you turn age 62 in December, your January check would be the last payment with the temporary, higher amount even if you choose not to take your Social Security retirement benefit.

ETF has no connection with the Social Security Administration (SSA). However, when calculating the temporary accelerated portion of an annuity, ETF estimates Social Security payments based on tables that assume an entire career of employment (30 or more years) covered under Social Security. **This amount may be very different from your actual Social Security payment at age 62.**

To help limit a decrease in your total income at age 62, you can get an online Social Security estimate at ssa.gov and then submit this information to ETF when requesting your retirement estimate. ETF will use this information to calculate your accelerated payment options.

Even if ETF uses your estimate from the SSA to calculate your temporary accelerated payment, there may still be a significant difference between the amount of your temporary payment and your actual Social Security payment beginning at age 62. The temporary portion of your annuity is subject to the same annual adjustments as the lifetime portion of your annuity. These adjustments (either positive or negative) are based on investment returns of the WRS Trust Funds and may exceed the increases in Social Security benefits. Therefore, if your temporary accelerated payment ending at age 62 is greater than your beginning Social Security payment, your income will be less.

Annuity Payment Options, continued

ETF's [accelerated payment calculator](#) is available at etf.wi.gov. This calculator will help you determine if an Accelerated Payment Option is right for you. It allows you to enter data from your retirement benefit estimate and calculates your *accelerated threshold*. The accelerated threshold is the point at which you begin to lose benefits as a result of choosing an Accelerated Payment Option. Essentially, the longer you live after age 62, the more it will "cost."

For more information about the retirement payment options, see the [Choosing an Annuity Option \(ET-4117\)](#) brochure.

Formula Benefit Calculation

The formula benefit calculation is as follows:

$$\begin{array}{l} \text{Final Average Monthly Earnings} \\ \times \text{Creditable Service} \\ \times \text{Formula Multipliers} \\ \times \text{Age Reduction Factor (if any)} \\ \hline = \text{For Annuitant's Life Only monthly amount} \end{array}$$

Final Average Earnings

Your final average earnings is expressed as a monthly amount. The average is calculated by adding the highest earnings for three calendar years (fiscal years for teachers, judges, and educational support personnel) and dividing this total by the creditable service earned during these years, then dividing by 12. The three years used are those in which reported earnings were the highest; they do not need to be consecutive, nor the last years reported.

Creditable Service

Your creditable service includes all service for which retirement contributions were made. For local employees other than teachers, it may include a service credit purchased by your employer for employment before the date that your employer began participating in the WRS. It also includes any service you purchased (e.g., forfeited, qualifying, other governmental service, etc.). For more information, see the [Buying Creditable Service \(ET-4121\)](#) brochure, available at etf.wi.gov or by contacting ETF.

Creditable service is expressed in decimal equivalents of a year. For example, one year of creditable service is equal to 1.00 year.

If you are a part-time employee and have questions about your part-time service, contact your payroll office or ETF to obtain the number of hours reported for you each year.

Creditable Military Service

If you have at least five years of creditable service under the WRS, you may be eligible for a WRS service credit for your years of active military service prior to 1974. One year of military service credit can be granted for each five years of actual WRS-creditable service, up to a maximum total of four years military service credit. To be eligible, you must meet the following conditions:

1. Previous credit has not been granted;
2. The military service was performed prior to 1974;
3. With certain exceptions, you are not using such military service time for federal retirement benefit purposes; and
4. Your discharge was under conditions other than dishonorable.

The 5-, 10-, 15- and 20-year requirements apply only to service actually credited to your WRS account and do not include any unpaid leave time or qualifying period.

If you have military service prior to 1974, send ETF a copy of your active military discharge papers (Form DD-214 or equivalent). Military service before your WRS employment is generally not granted until you apply for your annuity, so it is not normally reflected in the total service on your annual *Statement of Benefits*.

If you left employment with a WRS-participating employer for active military service, and returned to work for your pre-military service employer, you may also be eligible for additional military service credit under the federal Uniformed Services Employment and Reemployment Rights Act (USERRA) or under state law.

See ETF's website at etf.wi.gov or the [USERRA Certification \(ET-4560\)](#) form for more information.

Formula Multipliers

A formula multiplier is a percentage that ETF uses to calculate your formula retirement benefit. The multiplier(s) used to calculate your benefit depends on your employment category and when you worked in a WRS position.

Formula Multipliers			
Employment Category	Before 2000	After 1999	After Act 10 (effective in 2011)
General, Teachers, and Educational Support	.01765	.016	n/a
Protective with Social Security (police, county jailers, prison guards, sheriffs, deputies)	.02165	.020	n/a
Protective without Social Security (most firefighters)	.02665	.025	n/a
Elected Officials, State Executive Retirement Plan Employees, and Judges	.02165	.020	.016

Normal Retirement Age

Your normal retirement age is the age at which you may begin receiving a retirement annuity that is not reduced by an actuarial age reduction factor. The normal retirement ages for the various employment categories follow:

- Age 53: Protective occupation employees with at least 25 years of creditable service, including creditable military service.
- Age 54: Protective occupation employees with less than 25 years of creditable service, including creditable military service.
- Age 62: Elected officials, state executive retirement plan employees, and judges who first began in one of these categories *before* January 1, 2017.
- Age 65: General employees, teachers and educational support staff. Additionally, elected officials, state executive retirement plan employees, and judges who first began in one of these categories *after* December 31, 2016.

An annuity that begins before you reach normal retirement age is reduced because it is expected to be paid longer.

The annuities of protective category employees are reduced 0.4% per month for each month of age below normal retirement age. The annuities of non-protective employees are reduced 0.4% per month between ages 55 and 57.

Between age 57 and normal retirement age, the 0.4% is reduced by 0.001111% for each month of creditable service including creditable active military service. These are permanent reductions to annuities and continue to apply after your normal retirement age.

If you have service in more than one employment category and those categories have different normal retirement ages, the age reduction for early retirement is calculated separately for each employment category.

Maximum Monthly Benefit

The maximum monthly **formula** benefit payable depends on whether you were actively employed with a WRS employer after 1999:

- If you were actively employed after 1999, your maximum monthly formula benefit is 70% of your final average earnings. The maximum formula benefit is 65% of your final average earnings if you are a protective category employee covered under Social Security (police) or 85% if you are a protective employee not covered under Social Security (firefighter).

- If you were not actively employed after 1999, your maximum monthly formula benefit is 65% of your final average earnings. If you were a protective employee not covered by Social Security, your benefit maximum is 85% of your final average earnings.

The maximum monthly benefit limitation for your employment category applies to the *For Annuitant's Life Only* option. This limit is applied *before* any Variable adjustment to your annuity if you participate in the Variable program.

Variable Trust Fund Participation

If you participated in the Variable Trust Fund, your account has either a Variable excess or deficiency amount based on the investment experience of the Variable Fund. Your Variable excess/deficiency is included on your annual *Statement of Benefits*.

An excess is the amount you are *ahead*, and a deficiency is the amount you are *behind* based on Variable participation. The excess or deficiency

amount is multiplied by the money purchase factor for your age and increases or decreases your formula retirement or WRS disability benefit.

For more information about Variable participation, see the *Variable Trust Fund (ET-4930)* brochure, available at etf.wi.gov or by contacting ETF.

Calculate Your Formula Benefit

The sample worksheet on the next page shows a formula calculation. It includes columns for post-Act 10 service. Only members in the Elected/Executive category have post-Act 10 service.

The sample is for a general category employee who is age 59, with a spouse or domestic partner who is age 53.

Additionally:

- The employee has a final average monthly earnings of \$2,500.
- 25 years of creditable service (5 years pre-2000 and 20 years post-1999).

- A *projected* age 62 Social Security benefit of \$840.
- The employee participates in the Variable Fund and has a total excess balance of \$10,000.
- The employee selects a Joint Survivor 100% Continued option.

Regular Payment Calculation Sample	Pre-2000	Post-1999	Post-Act 10	Pre-2000	Post-1999	Post- Act 10
A. Enter your final average monthly earnings (see <i>Final Average Earnings</i> section).	\$ _____	\$ _____	\$ _____	\$2,500	\$2,500	\$ 0
B. Enter the appropriate formula multiplier(s) for your Pre-2000, Post-1999 and Post-Act 10 employment category (see <i>Formula Multipliers</i> section).	X _____	X _____	X _____	X .01765	X .016	X 0
C. Enter your years of Pre-2000, Post-1999 and Post-Act 10 creditable service at retirement (include creditable military service) in the appropriate column.	X _____	X _____	X _____	X 5	X 20	X 0
D. If applicable, find and enter your age reduction factor from one of the two following age reduction factors charts. Note: If you were divorced and your account was divided due to a Qualified Domestic Relations Order (QDRO), use the total of your current years of service plus the service deducted from your account by the QDRO division to find your age reduction factor from the chart.	X _____	X _____	X _____	X .952	X .952	X 0
E. Multiply A x B x C x D	\$ _____	\$ _____	\$ _____	\$ 210.04	X 761.60	X 0
F. Total:						
1. Add the amounts for E in columns Pre-2000, Post-1999, and Post-Act 10 together. This is the monthly amount of your For Annuitant's Life Only option.		\$ _____			\$210.04	
2. Test for maximum monthly benefit (see the <i>Maximum Monthly Benefit</i> section on page 8). Use maximum monthly benefit if lower than the total shown in F.		+ _____			+761.60	
		_____			\$971.64	
Skip to H, if you have not participated in the Variable Fund						
G. If in Variable:						
1. Enter the total Variable excess/deficiency as shown on your latest <i>Statement of Benefits</i> .		\$ _____			\$10,000.00	
2. Enter money purchase factor for your age from Table 2 on page 19.		_____			X .00571	
3. Multiply G 1 by G 2 and enter the amount.		+/- _____			+/- \$57.10	
4. If excess, add to F. If a deficiency, subtract from F. This is the amount of your For Annuitant's Life Only option with your current year Variable adjustment.		\$ _____			\$1,028.74	
H. Enter the option conversion factor from the Option Conversion Factor charts on pages 12-16 for the option which best meets your needs.		X _____			X .871	
I. Multiply F (G 4 if Variable participant) x H. This is the monthly amount for the option you selected. Repeat H and I to compare the amounts for different options.		\$ _____			\$896.03	
Stop here if you will be at least age 62 on your annuity effective date						
Accelerated Payment Schedule						
J. Enter your projected age-62 Social Security monthly pension amount (you can get this online at ssa.gov).		\$ _____			\$840.00	
K. Enter your accelerated payment calculation factor from the Accelerated Payment Calculation Factors chart on page 11.		X _____			X .1909	
L. Multiply J x K. This is the monthly actuarial cost of the Accelerated Payment option.		\$ _____			\$160.36	
M. Enter the For Annuitant's Life Only amount from F or G.		\$ _____			\$1,028.74	
N. Enter the Accelerated Payment option actuarial cost from L.		- _____			- 160.36	
O. Subtract N from M. This is your after-age-62 WRS monthly amount of your For Annuitant's Life Only option.		\$ _____			\$ 868.38	
P. Enter the option conversion factor for the option you selected (same factor used in H).		X _____			X .871	
Q. Multiply O x P. This is your after-age-62 WRS monthly amount for the option you selected . Repeat P and Q to compare the amounts for different options.		\$ _____			\$756.36	
R. Enter your projected monthly Social Security pension amount from J.		+ _____			+ 840.00	
S. Add Q + R. This is your total before-age-62 WRS monthly amount for the option you selected.		\$ _____			\$1,596.36	

Age Reduction Factors (Based on age and years of service)

Due to legislative changes: If you first began in an executive-elected category *after* December 31, 2016, read the chart from the top down. If you first began *before* January 1, 2017, read the chart from the bottom up.

General/Teachers and Elected Officials/Executives/Judges who first began in an executive-elected category <i>after</i> December 31, 2016													
Years of Service	Age												
	55	56	57	58	-	59	-	60	61	62	63	64	65
5	.584	.632	.680	.720	.704	.760	.752	.800	.840	.880	.920	.960	1.000
6	.597	.645	.693	.731	.712	.770	.760	.808	.846	.885	.923	.962	1.000
7	.610	.658	.706	.742	.720	.779	.768	.816	.853	.890	.926	.963	1.000
8	.622	.670	.718	.754	.728	.789	.776	.824	.859	.894	.930	.965	1.000
9	.635	.683	.731	.765	.736	.798	.784	.832	.866	.899	.933	.966	1.000

29	.891	.939	.987	.989	.896	.990	.944	.992	.994	.995	.997	.998	1.000
30+	.904	.952	1.000	1.000	.904	1.000	.952	1.000	1.000	1.000	1.000	1.000	1.000
Age				-	55	-	56	57	58	59	60	61	62

Elected Officials/Executives/Judges
who first began in an executive-elected category *before* January 1, 2017

The age reduction may be less if you have partial years of creditable service in at least 5 of the last 10 annual earnings periods immediately *before* the earnings period of your WRS termination. This *only* applies to partial years with non-teaching service to calculate your age reduction factor. ETF will calculate your final formula retirement or WRS disability benefit with the lower age reduction if you are eligible.

Age Reduction Factors—Protective Category

(Based on age and years of service)

Protectives					
Years of Service	Age 50	Age 51	Age 52	Age 53	Age 54
Under 25	.808	.856	.904	.952	1.000
25 & Over	.856	.904	.952	1.000	1.000

Accelerated Payment Calculation Factors

Age	Factor
50	.5505
51	.5210
52	.4900
53	.4572
54	.4213
55	.3821
56	.3396
57	.2939
58	.2446
59	.1909
60	.1326
61	.0691

Option Conversion Factors

To calculate your amounts for options other than *For Annuitant's Life Only*, use the factors for your valid options. Find the factors in the conversion tables below and on pages 11 and 13-16. These factors are effective January 1, 2020.

For **money purchase** calculations, always use the option conversion factors based on your actual age. Do not use the factors for your normal retirement age.

For **formula** calculations, non-protective category employees use the option conversion factors for your actual age or age 62, whichever is lower. Protective category employees use the factors for your actual age or normal retirement age, whichever is lower.

Life Annuities - 60 and 180 Monthly Payments Guaranteed

Non-Protectives Normal Retirement Age 65/62			Protectives - Normal Retirement Age				
Age of Member	60 months	180 months	Age of Member	53—At Least 25 Years Creditable Service		54—Less Than 25 Years Creditable Service	
				60 months	180 months	60 months	180 months

Life Annuity Joint and Survivor 75% Continued to Named Survivor

You may choose any person as your named survivor. However, if you choose someone who is not your spouse, the Internal Revenue Service has restrictions on the age difference between you and that person. If the age difference is more than 10 years, your annuity options are limited. See the [Named Survivor](#) section on ETF's website for more information.

* If you and/or your named survivor are past this age and money purchases applies, call ETF for the factors or use our [online calculator at etf.wi.gov](http://etf.wi.gov) for benefit estimates.

Money Purchase Value

Your employee-required contributions (whether paid by you or by your employer on your behalf), plus the employer-required contributions (shown on your *Statement of Benefits*) equals your money purchase benefit. This total amount is used to “purchase” your retirement benefit.

The *Money Purchase Benefit Calculation* on page 18 shows the procedure for estimating your money purchase retirement benefit.

If you participate in the Variable Fund, your total money purchase balance includes your Variable net gain or loss.

Interest Crediting

The Core and Variable interest is applied annually (effective December 31) to that year’s beginning balances. The interest you earn has a significant impact on the amount of your benefit, especially if:

- You participated in the Variable Trust Fund.
 - You made additional voluntary contributions to your account.
- or
- The amount of your benefit is higher using the money purchase calculation.

ETF cannot predict the future performance of the Core and Variable Trust Funds or future interest rates.

For members first employed after 1981 and who continued to be employed between 1984 and 1998, the fixed interest in 1985 and future years is set by statute at 5%. The 5% fixed interest provision was eliminated for all members who were active WRS employees on or after December 30, 1999.

Beginning on December 31, 1999, all active employees have the annual Core effective rate interest credited to their accounts. Additional contributions and all contributions of members employed prior to 1982 continue to receive effective

interest rate crediting based on the investment experience of the Trust Funds.

If you currently participate in the Variable Fund, the interest credited to your Variable account(s) reflects the actual Variable investment experience. Effective rate interest is credited to your account every year. Therefore, the Variable portion of your account is subject to annual gains or losses.

Interest crediting could affect your decision about when to apply for a benefit. Core and Variable effective rates of interest are normally announced by March. Assumed 5% interest is paid for the year your annuity begins, prorated for the number of months from January 1 through the full month prior to the effective date of your benefits.

If you are applying for a lump-sum benefit, prorated 5% interest applies to your account balance from January 1 through the end of the month **before** your benefit is approved to be paid. Apply by September 1 to have your lump-sum benefit approved **and** paid by the end of the year. Then, ETF applies prorated 5% interest instead of the effective rate of interest when paid the next year.

Calculate Your Money Purchase Benefit

You may estimate your money purchase retirement benefit by using the online WRS Retirement Benefits Calculator or by completing the manual calculation process on the next page using the tables on page 19.

The sample calculations that follow are for someone age 34 with a current money purchase retirement balance of \$10,600 with plans to begin an annuity at age 55.

Insert your age, money purchase retirement balance, and planned retirement age under the “Calculation” column and complete the steps to project your estimated benefit. To calculate an accelerated payment option for your money purchase benefit, see the *Calculation Sample* on page 9 and follow steps J to S.

Money Purchase Benefit Calculation

The Money Purchase Calculation Factors in Table 2 on page 19 *do not* apply if you terminated your WRS employment before March 9, 1984. Contact ETF for more details.

	Sample	Calculation
1. Enter the age you plan to begin your WRS retirement benefit (must be at least age 55, or age 50 for protective occupation employees).	55	_____
2. Enter your current age.	<u>-34</u>	- _____
3. Subtract the amount listed in #2 from the amount listed in #1. This is the number of years until your WRS retirement benefit begins.	21	_____
4. Your total money purchase balance (from your last annual <i>Statement of Benefits</i>).	\$10,600	\$ _____
5. Enter the Compound Interest Factor from Table 1 on page 19 for the years until your retirement benefit begins (#3 above) and the interest rate you assume to be earned over that period. Enter your money purchase balance from #4 above and multiply it by the interest factor to get your estimated money purchase balance on your retirement benefit effective date.		

Sample	Sample	Your Estimate
@ 5%	@ 7%	@ _____ %
\$10,600	\$10,600	\$ _____
<u>x 2.785</u>	<u>x 4.140</u>	x _____
<u>\$29,521</u>	<u>\$43,884</u>	\$ _____

6. Enter the money purchase factor from Table 2 on page 19 for your age when you plan to retire. Enter your estimated money purchase balance from #5 above and multiply it by the money purchase factor. (Age 55 sample continued.)

Sample	Sample	Your Estimate
\$29,521	\$43,884	\$ _____
<u>x .00538</u>	<u>x .00538</u>	x _____
<u>\$158.82</u>	<u>\$236.10</u>	\$ _____ per month

This shows the **basic** method to calculate a money purchase benefit to get the *For Annuitant's Life Only* option monthly amount. If you are an active employee, estimate what your future contributions and earnings on those contributions may be as of your retirement effective date (#1 above) and add to the money purchase balance in #5. To compute an accelerated payment option, see the *Calculate Your Formula Benefit* section and follow steps J to S. If you use the online calculator, it will use the money purchase factor and option conversion factors for your exact age on the benefit begin date.

Additional Contributions

Once all WRS-covered employment ends, you may apply for your employee additional contributions.

You may take this benefit as one of the following options:

- A lump-sum payment.
- A life annuity. Life annuity options are only available if your payment amount (*For Annuitant's Life Only* option) meets the minimum monthly amount or if your annuity from additional contributions begins on the same date as your monthly annuity from required contributions. If the start date for the additional contributions is different, the annuity amount must meet the minimum monthly amount.
- An annuity certain. An annuity certain is paid monthly for a specified period with the following restrictions:
 - o Monthly payments must be a minimum of 24 months and maximum of 180 months.
 - o An annuity certain amount must meet the minimum monthly amount on its own or start at the same time as the monthly payment from the required account. Even if the *For Annuitant's Life Only* option amount is less than the annual minimum amount, you may still be eligible for an annuity certain if it meets the annual minimum amount on its own. Go to etf.wi.gov for more information.

You can estimate your additional contribution benefits by using the Money Purchase Benefit Calculation process shown on page 18 or use the [online calculator](http://etf.wi.gov) at etf.wi.gov.

Each \$1,000 of additional contributions will provide the following monthly amounts, depending on the number of months selected as an annuity certain.

Annuity Certain	
Number of Months	Amount Per \$1000
24	\$43.82
36	\$29.92
48	\$22.98
60	\$18.82
72	\$16.05
84	\$14.08
96	\$12.61
108	\$11.46
120	\$10.55
132	\$ 9.81
144	\$ 9.19
156	\$ 8.67
168	\$ 8.23
180	\$ 7.85
